INSTRUCTIONS

DILA™ DIGITAL GRAPHICS PROJECTOR G2000

ENGLISH

Thank you for purchasing this projector. Before using it, read and follow all instructions carefully to take full advantage of the projector's capabilities.

SAFETY PRECAUTIONS

IMPORTANT INFORMATION

WARNING :

TO PREVENT FIRE OR SHOCK HAZARDS, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION :

To reduce the risk of electric shock, do not remove cover. Refer servicing to qualified service personnel.

This projector is equipped with a 3-blade grounding-type plug to satisfy FCC rule. If you are unable to insert the plug into the outlet, contact your electrician.

FCC INFORMATION (U.S.A. only)

CAUTION: Changes or modification not approved by Hughes-JVC Technology Corporation could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

About burning-in of the D-ILA device

Do not allow the same still picture to be projected for a long time or an abnormally bright video picture to be projected. Do not project video images with high-intensity or high-contrast on a screen. The video image could be burned in to the D-ILA device.

Use special care when projecting video games or computer program images. There is no problem with ordinary video-cassette playback images.

IMPORTANT SAFEGUARDS

Electrical energy can perform many useful functions. This unit has been engineered and manufactured to assure your personal safety. But **IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARD**. In order not to defeat the safeguards incorporated into this product, observe the following basic rules for its installation, use and service. Please read these "Important Safeguards" carefully before use.

- All the safety and operating instructions should be read before the product is operated.
- The safety and operating instructions should be retained for future reference.
- All warnings on the product and in the operating instructions should be adhered to.
- All operating instructions should be followed.
- Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
- Do not use attachments not recommended by the product manufacturer as they may be hazardous.
- Do not use this product near water. Do not use immediately after moving from a low temperature to high temperature, as this causes condensation, which may result in fire, electric shock, or other hazards.
- Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. The product should be mounted according to the manufacturer's instructions, and should use a mount recommended by the manufacturer.
- When the product is used on a cart, care should be taken to avoid quick stops, excessive force, and uneven surfaces which may cause the product and cart to overturn, damaging equipment or causing possible injury to the operator.
- Slots and openings in the cabinet are provided for ventilation. These ensure reliable operation of the product and protect it from overheating. These openings must not be blocked or covered. (The openings should never be blocked by placing the product on bed, sofa, rug, or similar surface. It should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided and the manufacturer's instructions have been adhered to.)

For proper ventilation, separate the product from other equipment, which may prevent ventilation and keep distance more than 60 cm (23-5/8").

SAFETY PRECAUTIONS (Cont.)

- This product should be operated only with the type of power source indicated on the label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company.
 - This product is equipped with a three-wire plug. This plug will fit only into a grounded power outlet. If you are unable to insert the plug into the outlet, contact your electrician to install the proper outlet. Do not defeat the safety purpose of the grounded plug.
 - Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Pay particular attention to cords at doors, plugs, receptacles, and the point where they exit from the product.
 - For added protection of this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power line surges.
 - Do not overload wall outlets, extension cords, or convenience receptacles on other equipment as this can result in a risk of fire or electric shock.
 - Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.
 - Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltages and other hazards. Refer all service to qualified service personnel.
 - Unplug this product from the wall outlet and refer service to qualified service personnel under the following conditions:
 - a) When the power supply cord or plug is damaged.
 - b) If liquid has been spilled, or objects have fallen on the product.
 - c) If the product has been exposed to rain or water.
 - d) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the Operation Manual, as an improper adjustment of controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
 - e) If the product has been dropped or damaged in any way.
 - f) When the product exhibits a distinct change in performance – this indicates a need for service.
 - When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or with same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.
 - Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.
 - The product should be placed more than one foot away from heat sources such as radiators, heat registers, stoves, and other products (including amplifiers) that produce heat.
 - When connecting other products such as VCR's, and personal computers, you should turn off the power of this product for protection against electric shock.
 - Do not place combustibles behind the cooling fan. For example, cloth, paper, matches, aerosol cans or gas lighters that present special hazards when over heated.
 - Do not look into the projection lens while the illumination lamp is turned on. Exposure of your eyes to the strong light can result in impaired eyesight.
 - Do not look into the inside of this unit through vents (ventilation holes), etc. Do not look at the illumination lamp directly by opening the cabinet while the illumination lamp is turned on. The illumination lamp also contains ultraviolet rays and the light is so powerful that your eyesight can be impaired.
 - Xenon gas is enclosed with high pressure inside the light-source lamp (lamp unit) of this projector. If you drop or impart a shock to the lamp, or discard it as is, there is the possibility of explosion, leading to personal injury. Use special care when handling the lamp. For any unclear points, consult your product dealer.
 - Use only the accessory cord designed for this product to prevent shock.
- The power supply voltage rating of this product is AC 120 V, the power cord attached conforms to the following power supply voltage. Use only the power cord designated by our dealer to ensure Safety and EMC.
- When it is used by other power supply voltage, power cable must be changed.
- Consult your product dealer.
- Power cord
- 
- Power supply voltage: AC 120 V
- * DO NOT allow any unqualified person to install the unit.**

Be sure to ask your dealer to install the unit (eg. attaching it to the ceiling) since special technical knowledge and skills are required for installation. If installation is performed by an unqualified person, it may cause personal injury or electrical shock.

Accessories

The following accessories are included with this projector. Check for them; if any item is missing, please contact your dealer.

Remote control unit (RM-M100U)

AAA/R03-size dry cell battery (×2)
(for checking operation)

Power cord
[approx. 2.5 m (8.2 ft)]

Personal computer connection cable
[approx. 2 m (6.56 ft)]
(D-sub, 3-row 15 pin)

AV connection cable
[approx. 1.5 m (4.92 ft)]

Audio cable
[approx. 3 m (9.84 ft)]
(3.5 mm dia. stereo mini plug)

Conversion adapter for Mac
(for Macintosh)

BNC-RCA conversion plug

ENGLISH

Controls and Features

Front Side / Top Surface / Right Side

1 Exhaust vents

Vents for cooling fans through which warm air comes out.

CAUTION

- Do not block the exhaust vents, or heat builds up inside, possibly causing a fire. Also, do not touch the vents, or this could cause a low-temperature burn.

2 Carrying handle

Raise this handle when carrying the projector.

CAUTIONS

- When carrying the projector, do not give a shock to it. Be careful to keep its balance.
- Do not carry it while the light source lamp is on or the cooling fan is operating. This could cause personal injury.

How to use the carrying handle

3 AC IN (power input) terminal

This is the power input terminal where the supplied power cord is connected. For details, refer to page 24.

4 Fuse holder

A fuse rated 15A/250V is installed. (Power source protection)
To replace the fuse, use a fuse with the same specifications.

5 MAIN POWER switch

This is the main power switch. When it is turned on, the projector goes into stand-by state, and the STAND BY indicator on the control panel comes on.

ON [I]: The main power turns on.

OFF [O]: The main power turns off.

6 Adjustable foot (for horizontal angle adjustment)

By extending the feet, the projector angle can be adjusted up to +7°.

•Extending the front adjustable foot

While pushing the lever, raise the projector, and the adjustable foot extends automatically.

To retract the foot, pushing the lever, lower the projector slowly; the projector is fixed at the position where you release the lever.

7 Built-in speaker (left)

8 Built-in speaker (right)

9 Lens

Projection lens, which is an electrically driven, approx. 1.5 x zoom lens. Before projection, remove the lens cap.

10 Lens cap

The cap has a string attached and the string is fixed to the projector when shipped from the factory. It is recommended that the cap be fitted on to prevent the lens becoming dirty when the projector is not used.

11 Remote sensor

When operating with the remote control, aim it toward this sensor. You can also operate the remote control by pointing it to a screen and allowing the remote sensor to receive the reflected light.

Controls and Features (cont.)

Left-hand side

12 Control panel

For details, refer to "Control Panel" (page 9).

13 Connector panel

For details, refer to "Connector Panel" on page 11.

14 Adjustable foot (for horizontal angle adjustment)

It is set at the shortest position when shipped from the factory. Turn the foot to make the projector level. Adjustment can be made in the range of $+1.5^\circ$ and -1.5° from the horizontal position.

ENGLISH

Controls and Features (cont.)

Bottom Surface

15 Air intake area (filter)

Air is taken in through this area to cool the light-source lamp. If this area is blocked or if something that obstructs taking in or exhausting air is placed around the projector, heat may build up inside and could cause a fire. For details, refer to "Precautions for Installation" on page 15.

CAUTIONS

- Be careful as paper, cloth or soft cushion could be drawn in if placed nearby. Do not block the intake area, or heat may build up and could cause a fire.
- Clean the filter periodically. For details, refer to "Cleaning and Replacing the Filter" on page 64.
Deposition of dirt on the filter works to reduce the cooling effect, causing heat to build up inside, which could cause a fire or malfunction.

16 Opening for replacing the light-source lamp

For replacing the light-source lamp, refer to "Replacing the Light-Source Lamp" on page 61.

17 Fixing foot

18 Position selecting screw for ceiling mounting

When using the projector in an upside-down, ceiling-mounted position (inverted top-to-bottom and right-to-left), the "position selecting screw for ceiling mounting" must be turned to switch to ceiling mounting.

This will correct variance in color images (shading), which otherwise would occur in ceiling mounting.

For more information, refer to "Setting the position selecting screw for ceiling mounting" on page 18.

CAUTIONS

- To ceiling-mount and adjust the projector, special expertise and technique are necessary. Be sure to ask your dealer or a specialist to perform this work.

Controls and Features (cont.)

Control Panel

1 STAND BY Indicator

ON : When in stand-by mode.
Blinking : When in cool-down mode.

Memo

About the cool-down mode:

This projector has a function to cool down the heated lamp for a fixed period of time (approx. 120 seconds) after projection is finished. This feature is referred to as the cool-down mode.

CAUTION

- The purpose of the cool-down mode is to prevent inner parts from being deformed or broken by heat from the heated lamp as well as to prolong the life of the lamp. Do not turn off the main power switch while in the cool-down mode. Also, do not place the projector on its side or stand it upright; this may block the exhaust vents.

2 OPERATE indicator

ON: When the projector is in operation (projecting)

3 OPERATE button

When the projector is in the stand-by mode, press this button one second or more, and the main power switch is turned on, causing the OPERATE indicator to light. Press it one second or more again, and the projector goes into the cool-down mode, then stand-by mode.

Memo

While in the cool-down mode:

If you press the OPERATE button, the projector is not tuned on.

4 Lamp indicator

ON : After the light-source lamp has been used for more than approx. 900 hours.

Blinking : Replace the lamp. Refer to "Replacing the Light-Source Lamp" on page 61.

5 TEMP indicator

ON: The temperature inside the projector has abnormally risen.

Note

- While the TEMP indicator is on (during abnormal temperature), the power is automatically cut off, and an emergency mode is shown (with the EMERGENCY indicator blinking).

6 EMERGENCY indicator

Blinking: Something abnormal has occurred with the projector.

Memo

About the emergency mode:

The emergency mode is shown when the following anomalies have occurred with the projector (the EMERGENCY indicator blinks). In the emergency mode, projection is automatically interrupted and the cooling fans operate for about 20 seconds.

- When the air filter is displaced.
- When the filter is clogged.
- When the light-source lamp has suddenly gone off.
- When the fans have stopped.
- When the temperature inside has risen abnormally high.

CAUTION

• When an emergency mode is shown:

After the cooling fans have stopped, turn off the main power switch and unplug the power cord from the wall outlet.

Make sure the lamp-replacement cover and the air filter are correctly installed. Then, plug in the power cord again and operate the projector.

If it goes into an emergency mode again, after the cooling fans have stopped, turn off the main power switch, unplug the power cord, and call your dealer for repair.

Controls and Features (cont.)

Control Panel (Cont.)

7 VIDEO button

Use this button to select a device such as a video deck connected to the AV IN terminal of the projector. Each time you press the button, the device selected changes as follows:

8 COMPUTER button

Use this button to select a device connected to the COMPUTER -1 or -2 terminals. Each time you press the button, the selection changes as follows:

9 SETTING button

Use this button to call up the setting menu. For details, refer to "Making Basic Settings" on page 32.

10 QUICK ALIGN. button

While a menu screen is shown, use this button to adjust the values for the item selected. When no menu is shown, the quick alignment function works.

• When a menu is shown

- + ► button:** The value for the selected item increases.
- ◀ button:** The value for the selected item decreases.

• When no menu is shown

Press the + ► button and – ◀ button at the same time: QUICK ALIGNMENT is displayed on the screen and the quick alignment function works (TRACKING, PHASE, H. POS. and V. POS. are automatically adjusted). When the adjustment is finished, the display goes off automatically.

Memo

The quick alignment function :

- Works for computer input (COMPUTER- 1 and - 2 input terminals) signals.
- Does not work for video input (AV IN input terminal) signals.

CAUTION

- Automatic adjustment with the quick alignment function should be done on a bright still-picture screen. This function may not work correctly on a dark screen or motion-picture screen. If adjustment with this function is not satisfactory, adjust TRACKING, PHASE, H. POS. and V. POS. manually (see pages 32, 38 and 39).

Controls and Features (cont.)

Connector Panel

1 Y/C (S video) input terminal (Mini DIN 4 pin)
Connect this terminal to the S video output terminal of a video deck, etc.

2 VIDEO (composite video) input terminal (BNC)
Connect this terminal to the composite video output terminal of a video deck, etc.

3 Y, Pb/B-Y, Pr/R-Y input terminals (BNC)
These are input terminals for component (Y, B-Y, R-Y) signals or DTV-format (Y, Pb, Pr) signals. Device with component output terminals can be connected.
* For details about DTV-format signals (480i, 480p, 720p, 1080i) compatible with this unit, refer to page 69.

4 AUDIO L/R (Audio • left/right) input terminals (pin jacks)
Of devices connected to the video input terminals, such as a video deck, etc., the audio output terminals of the device to be projected is connected to these terminals. The input audio signal is reproduced by the speakers of the projector. The signal is also output from the AUDIO OUT terminal of the projector.
* When the input signal is stereo signal, connection should be made to both L and R.
* Signals from a monaural device should be connected to only L. That way, the projector's speakers and the AUDIO OUT terminal produce the same sound from both L and R.

5 AUDIO OUT (audio output) terminal (stereo mini jack)
Of input signals inputted to the projector, the audio signal of the device being projected is output. Volume should be adjusted using the VOL. (+/-) buttons on the remote control or VOLUME on the setting menu. When a cable is connected to this jack, no audio sound is produced from the projector's speakers.

6 REMOTE terminal (mini jack)
Connect an infrared remote control extension unit, etc. to this jack.
* For details, consult your dealer.

7 RS-232C terminal (D-sub 9 pin)
This is a RS-232C interface-specified terminal. This projector can be controlled by a computer connected externally.
* For details, consult your dealer.

8 COMPUTER OUT (computer output) terminal (D-sub 3-row 15 pin)
The computer input signal projected on the screen is output. A display unit can be used by connecting it to this terminal.

Memo

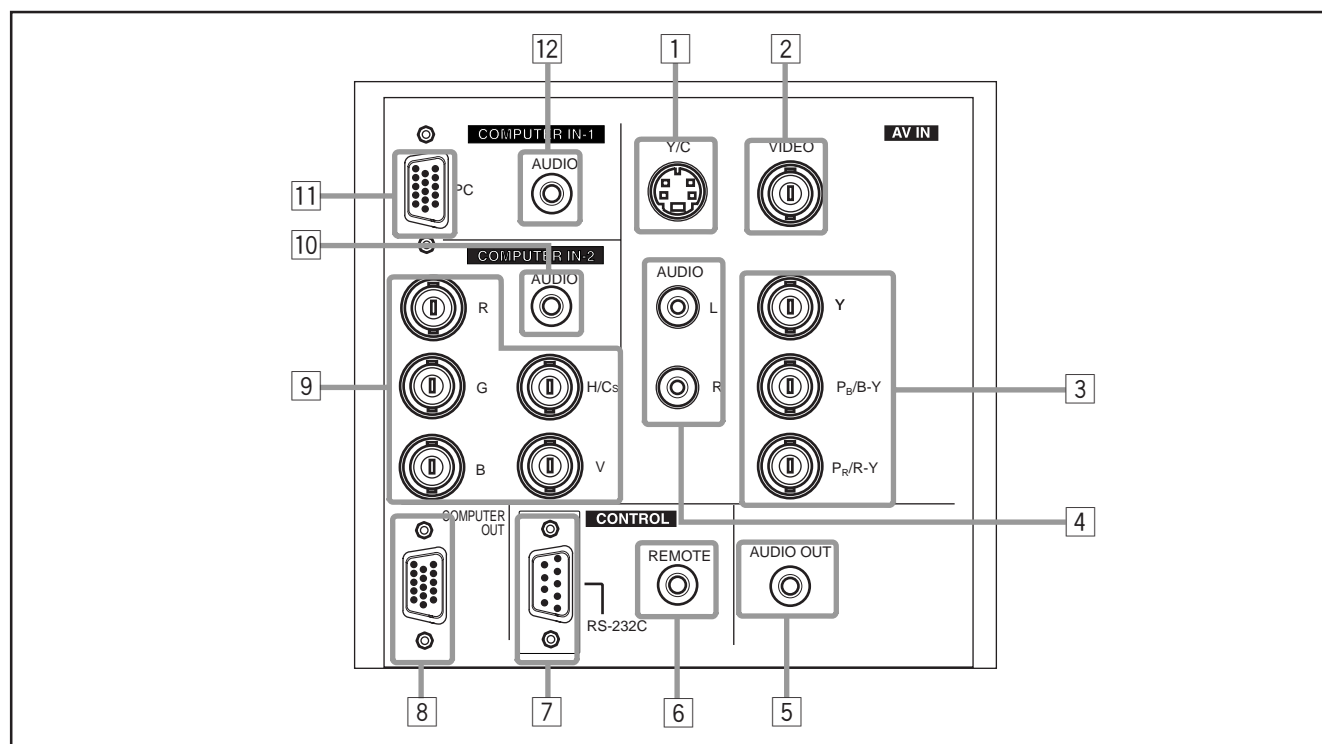

To select the proper audio input for video input:

The video input terminals (AV IN input terminals) can be switched with the projector's or remote control's VIDEO button. However, since this projector has only single audio input terminal, reconnect audio input in accordance with the AV device to be used.

Controls and Features (cont.)

Connector Panel (Cont.)

9 COMPUTER IN (computer input) -2 terminal (BNC)

These are input terminals for analog RGB signals, vertical sync (V) signals, and horizontal sync (H) signals / composite signals(Cs). Devices which have analog RGB signal output terminals can be connected.

*** Input of external sync signals is automatically detected.**

Detection of H/V signals or Cs signals causes automatic switch to external sync. The priority order is H/V > Cs.

Note

- DTV-format (480i, 480p, 720p, 1080i) signals can be input. When the source is set to "AUTO", signals of 480i and 1080i can automatically be detected, but 480p and 720p signals can not be detected. To be able to input 480p or 720p signal, the source should be set to a dedicated source mode "SDTV(480p)" or "HDTV(720p)". For setting the source, refer to "Changing (setting) the source" on page 47.

CAUTION

- When computer-related signals are input, the uppermost edge of the screen may appear bowing if the sync signal input is composite sync (Cs) or G on sync signal. In that case, use separate sync signals for vertical sync (V) and horizontal sync (H).

10 AUDIO input terminal (stereo mini jack)

This is an audio input terminal for COMPUTER IN (computer input) -2 terminal. Connect the audio output signal of a device connected to COMPUTER IN (computer input) -2 terminal.

* When input to COMPUTER -2 is selected, the audio signal input is reproduced by the projector's speakers. Also, signals can be output from the AUDIO OUT (audio output) terminal.

(However, if a cable is connected to AUDIO OUT (audio output) terminal, audio sound does not come out from

the projector's speakers.)

11 COMPUTER IN (computer input) -1 terminal (D-sub 3-row 15 pin)

This is an input terminal (PC) dedicated for computer signals (RGB video signals and sync signals).

Connect the display output terminal of the computer to this terminal. When a Macintosh computer is to be connected, use the Conversion adapter for Mac supplied.

CAUTION

- When computer-related signals are input, the uppermost edge of the screen may appear bowing if the sync signal input is composite sync (Cs) or G on sync signal. In that case, use separate sync signals for vertical sync (V) and horizontal sync (H).

12 AUDIO (audio) input terminal (stereo mini jack)

This is an audio input terminal for COMPUTER IN (computer input) -1 terminal. Connect the audio output signal of a device connected to COMPUTER IN (computer input) -1 terminal.

* When input to COMPUTER -1 is selected, the audio signal input is reproduced by the projector's speakers. Also, signals can be output from the AUDIO OUT (audio output) terminal.

(However, if a cable is connected to AUDIO OUT (audio output) terminal, audio sound does not come out from the projector's speakers.)

Controls and Features (Cont.)

Remote Control Unit

1 Remote control's signal transmitter

2 COMPUTER button

Use this button to select the devices connected to the projector's COMPUTER IN (computer input) -1 and -2 input terminals. Each time you press the button, the selection changes as follows:

3 VIDEO button

Use this button to select the devices such as a video connected to the projector's AV IN (AV input) terminal. Each time you press the button, the selection changes as follows:

4 ZOOM (T/W) button

Use these buttons to increase or decrease the screen size. (The projector's projection lens is an electrically driven zoom lens of about 1.5 x.)

T : The screen size decreases.

W: The screen size increases.

5 FOCUS (+/-) button

Use these buttons to adjust the focus of the projected video.

+: The focus point becomes more distant.

-: The focus point becomes nearer.

6 MENU/ENTER button

Use this button to display the main menu. While the main menu is displayed, pressing this button displays a details setting (submenu) for items with details settings.

7 Cursor (▲/▼/◀/▶) button

While the main menu is displayed, use these buttons to select an item to adjust or make adjustment.

8 AV MUTING (On/Off) button

Use this button to turn off the video image and audio sound temporarily. Pressing it again makes the video image and audio sound to resume.

9 QUICK ALIGN. (Quick Alignment) button

Use this button to automatically adjust TRACKING, PHASE, H. POS. and V. POS. of the projected video. During the automatic adjustment, QUICK ALIGNMENT appears on the screen, and disappears after it is finished.

Memo

Quick alignment function:

Does not work for video input (AV IN input terminal) signals. Works only for computer-related (COMPUTER-1 and-2 input terminals) signals.

CAUTION

- Automatic adjustment with the quick alignment function should be done on a bright still-picture screen. This function may not work correctly on a dark screen or motion-picture screen. If adjustment with this function is not satisfactory, adjust TRACKING, PHASE, H. POS. and V. POS. manually (see pages 32, 38 and 39).

10 PRESET button

While making adjustment on the main or setting menu, use this button to reset the setting of the selected item to the factory-set value. This button works only for numerical settings and does not work for switching ON to OFF.

11 PAGE BACK button

While a details setting is displayed, use this button to go back to the previous page.

12 VOL. (Volume) (+/-) button

Use these buttons to adjust the sound volume:

+: Increase the volume level.

-: Decrease the volume level.

13 OPERATE button

To turn on the power, press this button for one second or more.

* About 30 seconds after the power has turned on, video image will appear on the screen.

Controls and Features (cont.)

Installing Batteries

Install batteries in the remote control. If the remote control has started to work erratically, replace the batteries.

1 Open the back cover.

While pushing on the back cover, slide it in the direction of the arrow.

2 Install the batteries.

Place the two batteries (AAA/R03-size) supplied in the remote control as illustrated below.

3 Close the back cover.

Slide the back cover in the direction of the arrow until a click is heard.

Precautions for using batteries

If batteries are used incorrectly, they may crack or leak liquid. This could cause a fire, burn, malfunction, or staining or damaging the surrounding.

Beware of the following:

- Do not mix new and old batteries.
- Do not mix different types of batteries as they differ in characteristics.
- Place batteries so they match the polarities indicated: (+) to (+) and (-) to (-).
- Be sure to put the minus (-) end in first to avoid short-circuiting.
- Use only designated batteries.
- Remove the batteries if not used for a prolonged period of time.
- When the batteries are exhausted, replace them immediately. Otherwise, liquid could leak, or malfunction could occur due to leaked liquids. If the leaked liquid contacts the skin, wipe it off with a cloth, otherwise the skin could become rough.
- Do not put batteries into fire or try to recharge them.
- Batteries run for six months to one year in normal use. But the batteries supplied are for confirming operation and may not run that long. When the remote control starts failing to work properly, replace the batteries with new ones.

Installing the Projector

Precautions for Installation

CAUTION

Do not install the projector in the following places :

- There is much water, humidity or dust.
 - The projector may be subjected to oil smoke or cigarette smoke.
 - On a soft surface such as a carpet or cushion.
 - The projector may be subjected to direct sunlight.
 - Temperature is high or humidity is low.
- Allowable operation temperature range: + 5°C to + 35°C (41°F to 95°F)
Allowable relative humidity range: 20% to 80% (no condensation)
Allowable storage temperature range: -10°C to +60°C (14°F to 140°F)

■ When installing the projector, observe the followings:

- **Do not use the projector placed on its side.**
Avoid using the projector placed on its side. This could cause a malfunction.
- **Use the projector within the installed angle.**
Avoid using the projector inclined $\pm 30^\circ$ or more right-to-left or left-to-right. This could cause color variation or harm the lamp life.
- **Do not block the exhaust vents.**
Do not use a cover which encloses the projector air-tight or blocks the exhaust vents. Allow sufficient space around the projector. When the projector is enclosed in a space of the following dimensions, use an air conditioner so the temperature inside becomes equal to the outside temperature.

Allowable minimum space required

ENGLISH

Installing the Projector (Cont.)

Projection Distance and Screen Size

- The projector's projection lens is a zoom lens of about 1.5 x. The screen size at the maximum enlargement is 1.5 times that of the minimum size.
- The projection distance that can be focused is 2.5 to 20 m. Install the projector within this range.

Projection distance	Projection screen size (diagonal length)			
	When screen aspect ratio is 4 : 3		When screen aspect ratio is 16 : 9	
	Minimum projection screen	Maximum projection screen	Minimum projection screen	Maximum projection screen
8.2 ft (2.5 m)	42" (approx. 107 cm)	63" (approx. 160 cm)	39" (approx. 100 cm)	57" (approx. 144 cm)
16.4 ft (5 m)	86" (approx. 219 cm)	128" (approx. 325 cm)	79" (approx. 201 cm)	117" (approx. 297 cm)
32.8 ft (10 m)	172" (approx. 437 cm)	259" (approx. 657 cm)	158" (approx. 402 cm)	237" (approx. 601 cm)
65.6 ft (20 m)	345" (approx. 877 cm)	521" (approx. 1,323 cm)	317" (approx. 806 cm)	478" (approx. 1,214 cm)

*Also, refer to the table of "Relationship Between Projection Distances and Projection Screen Sizes" on page 17 as a reference.

CAUTIONS and NOTES

- Install the screen so the lower edge of the projected picture aligns with the extended center line of the projector's lens. That way, the lower edge of the picture projected on a 4 : 3 aspect ratio screen aligns with the extended center line of the lens. Also, the screen must be at right angles with the extended center line of the lens (so that projection occurs at right angles with the screen).
- When installing the screen, use a 4 : 3 aspect ratio picture.
(A 16 : 9 aspect ratio picture is projected based on the width of the range in which a 4 : 3 aspect ratio picture is projected.)
- The diagonal length of a 16 : 9 aspect ratio picture is about 91.8% that of a 4 : 3 aspect ratio picture. This value is a guide and should be used as a reference.
- When projecting at the maximum projection distance (20 m/65.6 ft), we recommend that the projector be used with the zoom on the Tele (T).
- If sunlight or lamp light strikes the projection screen directly, the picture becomes whitish and dim. Be sure to use a curtain, etc. to shield the light.
- Trapezoidal distortion may not be corrected.
Adjust the projector within the range of angle adjustment (up/down adjustment angle: +7°; horizontal adjustment angle: ±1.5°) so that it is set up level.
- The numeric values listed in the table of Relationship between Projection Distances and Screen Sizes on page 17 are provided only as a guide or reference. The projection sizes may vary within manufacturing tolerances of the projection lens.
- When hanging the projector from the ceiling, use a dedicated hanging fixture.

Installing the Projector (Cont.)

Relationship between Projection Distances and Projection Screen Sizes

■ For 4 : 3 aspect ratio screens

Projection distance	Projection screen size (diagonal length)	
	Minimum projection screen size (Tele end)	Maximum projection screen size (Wide end)
8.2 ft (2.5 m)	42" (approx. 107 cm)	63" (approx. 160 cm)
9.84 ft (3.0 m)	51" (approx. 130 cm)	76" (approx. 193 cm)
13.12 ft (4.0 m)	68" (approx. 173 cm)	102" (approx. 259 cm)
16.4 ft (5.0 m)	86" (approx. 219 cm)	128" (approx. 325 cm)
19.68 ft (6.0 m)	103" (approx. 262 cm)	154" (approx. 391 cm)
22.96 ft (7.0 m)	120" (approx. 305 cm)	180" (approx. 457 cm)
26.24 ft (8.0 m)	138" (approx. 351 cm)	207" (approx. 525 cm)
29.52 ft (9.0 m)	155" (approx. 394 cm)	233" (approx. 591 cm)
32.8 ft (10.0 m)	172" (approx. 437 cm)	259" (approx. 657 cm)
36.08 ft (11.0 m)	190" (approx. 483 cm)	285" (approx. 723 cm)
39.36 ft (12.0 m)	207" (approx. 526 cm)	310" (approx. 787 cm)
42.64 ft (13.0 m)	224" (approx. 569 cm)	338" (approx. 858 cm)
45.92 ft (14.0 m)	242" (approx. 615 cm)	364" (approx. 924 cm)
49.2 ft (15.0 m)	260" (approx. 661 cm)	390" (approx. 990 cm)
52.48 ft (16.0 m)	276" (approx. 702 cm)	416" (approx. 1,056 cm)
55.76 ft (17.0 m)	294" (approx. 747 cm)	443" (approx. 1,125 cm)
59.04 ft (18.0 m)	311" (approx. 790 cm)	469" (approx. 1,191 cm)
62.32 ft (19.0 m)	328" (approx. 834 cm)	495" (approx. 1,257 cm)
65.6 ft (20.0 m)	345" (approx. 877 cm)	521" (approx. 1,323 cm)

■ For 16 : 9 aspect ratio screens

Projection distance	Projection screen size (diagonal length)	
	Minimum projection screen size (Tele end)	Maximum projection screen size (Wide end)
8.2 ft (2.5 m)	39" (approx. 100 cm)	57" (approx. 144 cm)
9.84 ft (3.0 m)	47" (approx. 120 cm)	69" (approx. 175 cm)
13.12 ft (4.0 m)	63" (approx. 161 cm)	93" (approx. 236 cm)
16.4 ft (5.0 m)	79" (approx. 201 cm)	117" (approx. 297 cm)
19.68 ft (6.0 m)	95" (approx. 242 cm)	140" (approx. 355 cm)
22.96 ft (7.0 m)	110" (approx. 280 cm)	165" (approx. 419 cm)
26.24 ft (8.0 m)	126" (approx. 321 cm)	189" (approx. 480 cm)
29.52 ft (9.0 m)	142" (approx. 361 cm)	213" (approx. 541 cm)
32.8 ft (10.0 m)	158" (approx. 402 cm)	237" (approx. 601 cm)
36.08 ft (11.0 m)	174" (approx. 442 cm)	260" (approx. 660 cm)
39.36 ft (12.0 m)	190" (approx. 483 cm)	286" (approx. 726 cm)
42.64 ft (13.0 m)	206" (approx. 524 cm)	310" (approx. 787 cm)
45.92 ft (14.0 m)	222" (approx. 564 cm)	334" (approx. 848 cm)
49.2 ft (15.0 m)	238" (approx. 605 cm)	358" (approx. 909 cm)
52.48 ft (16.0 m)	254" (approx. 646 cm)	382" (approx. 970 cm)
55.76 ft (17.0 m)	270" (approx. 686 cm)	406" (approx. 1,031 cm)
59.04 ft (18.0 m)	285" (approx. 724 cm)	430" (approx. 1,092 cm)
62.32 ft (19.0 m)	301" (approx. 765 cm)	454" (approx. 1,153 cm)
65.6 ft (20.0 m)	317" (approx. 806 cm)	478" (approx. 1,214 cm)

ENGLISH

Installing the Projector (Cont.)

Effective Range and Distance of the Remote Control Unit

The operable distance of the remote control unit is about 10 m (32.8 ft) for direct reception. The remote control can be used by having it reflected on the screen, etc. When you use the remote control by reflecting it at the screen, the total distance of A + B should be about 10 m (32.8 ft) or less. The operable angles of the remote control unit is 50° right to left, and 15° up and down.

The effective range and distance of the remote control unit

Note

- Depending on the type of the screen used, the effective distance of the remote control may be reduced.

Setting the position selecting screw for Ceiling Mounting

When using the projector in an upside-down, ceiling-mounted position (inverted top-to-bottom and right-to-left), the “position selecting screw for ceiling mounting” must be turned to switch to ceiling mounting. This will correct variance in color images (shading), which otherwise would occur in ceiling mounting. To revert to normal desktop setting, turn the “position selecting screw for ceiling mounting” back to the initial position (factory-shipped).

[When using the projector in an upside-down, ceiling mounting position (inverted top-to-bottom and right-to-left)]

- Turn the “position selecting screw for ceiling mounting” **counterclockwise fully** (until it is turning idly).

[To again use the projector in a normal desktop setting]

- Turn the “position selecting screw for ceiling mounting” **clockwise fully** (until it tightens firmly).

For normal desktop mounting:

Turn clockwise.

For upside-down, ceiling-mounting:

Turn counterclockwise.

CAUTIONS

- To ceiling-mount and adjust the projector, special expertise and technique are necessary. Be sure to ask your dealer or a specialist to perform this work.
- To turn the “position selecting screw for ceiling mounting”, use a Phillips screwdriver with a 30-mm or longer shank. The screw is located in the hole shown in the illustration.

Connecting to Various Devices

* Before connection, be sure to turn off the projector and connected devices.

* Read the manual which comes with each device thoroughly.

Signals that Can Be Input to the Projector

The following signals can be input to the projector:

■ Video signals

(1) Response to color systems

Color system Input terminal	NTSC	NTSC4.43	PAL	SECAM
VIDEO	○	○	○	○
Y/C	○	○ ^{*1}	○	-----
Y, P _B /B-Y, P _R /R-Y	○ ^{*2}	○ ^{*2}	○ ^{*2}	○ ^{*2}
G, B, R, H/Cs, V	○ ^{*2}	○ ^{*2}	○ ^{*2}	○ ^{*2}

*₁ : Responds if Y/C output is available.

*₂ : Signifies that component signals ("Y, P_B, P_R" / "Y, B-Y, R-Y" / "G, B, R, H/Cs, V") conform to the signal timing (synchronization and video period) of each color system. The color systems are used for convenience only.

(2) Response to double density (*1), high-vision signals

Input terminal	NTSC ^{*2}	PAL ^{*3}	High-vision signal
Y, P _B /B-Y, P _R /R-Y	○	○	○
G, B, R, H/Cs, V	○	○	○

*₁ : Signals whose density of scanning lines/field is twice as high.

*₂ : Responds to signals whose horizontal scanning frequency is 31.5 kHz. NTSC can be made twice as dense by a line doubler (separately available: recommended article). Also, possible to respond to fully-specified, decoded 525P progressive signals.

*₃ : Responds to signals whose horizontal scanning frequency is 33.5 kHz. PAL can be made twice as dense by a line doubler (separately available: recommended article).

Note

• DTV-format signals (480i, 480p, 720p, 1080i) can be input into this unit (Y, P_B/B-Y, P_R/R-Y input terminals). For details about DTV-format signals (480i, 480p, 720p, 1080i) compatible with this unit, refer to page 69.

■ Computer signals

- Signals with the following resolutions can be input to the input terminal of COMPUTER IN-1 (PC) or COMPUTER IN-2 (G, B, R, H/Cs, V). (The following signals are preset.)

Screen resolution (standard name)	Horizontal frequency	Vertical frequency	Scanning method
640 × 400 (PC-9801)	24.8kHz	56.4Hz	Non-interlace
640 × 350 (VGA1)	31.5kHz	70.1Hz	Non-interlace
640 × 480 (VGA3)	31.5kHz	59.9Hz	Non-interlace
640 × 480 (Macintosh 13")	35.0kHz	66.7Hz	Non-interlace
640 × 480 (VGA VESA)	37.5kHz	75.0Hz	Non-interlace
800 × 600 (SVGA1)	37.9kHz	60.3Hz	Non-interlace
800 × 600 (SVGA2)	48.1kHz	72.2Hz	Non-interlace
832 × 624 (Macintosh16")	49.7kHz	74.6Hz	Non-interlace
1024 × 768 (XGA1)	48.4kHz	60.0Hz	Non-interlace
1024 × 768 (XGA2)	56.5kHz	70.1Hz	Non-interlace
1024 × 768 (Macintosh 19")	60.2kHz	74.9Hz	Non-interlace
1152 × 870 (Macintosh 21")	68.7kHz	75.0Hz	Non-interlace
1280 × 1024 (SXGA1)	64.0kHz	60.0Hz	Non-interlace
1280 × 1024 (SXGA2)	70.8kHz	67.0Hz	Non-interlace
1360 × 1024 (SXGA3: Mac Board)	80.0kHz	75.1Hz	Non-interlace

Notes

- Interlace signals are not handled.
- Some signals other than listed above can be displayed. But they require adjustment. Even some of the signals listed above may require adjustment depending on the video board used.
- When a signal other than listed above is input, the screen could be partially erased or an unneeded fold-over screen could appear.
- Even signals in the frequency range that can be input may not be displayed normally depending on the type of the signal.
- Composite sync.(Cs) and G on sync. signals can not handled depending on the devices connected.

Connecting to Various Devices (Cont.)

Connecting to Video Devices

Before connection, be sure to turn off both the projector and video device.

- Read the manual which comes with each video device thoroughly.
- Use the supplied AV connection cable. An AV connection cable with an S video terminal is not supplied.

To Y/C

S video cable (separately available)

BNC-RCA conversion plug (accessory)

To VIDEO

To AUDIO (L)

To AUDIO (R)

AV connection cable (accessory)

Video devices

- VCR (Video Cassette recorder)
- Laser video disc player
- Camcorder

To select the proper audio input for video input

The video input terminal (AV IN input terminal) can be switched with the VIDEO button. However, since this projector has only a single audio input terminal, reconnect audio input in accordance with the AV device to be used.

Memo

- When connecting a video device, use a TBC along with it, or one which has a built-in TBC.
- Use of an extension cable to connect a video device and the projector could cause video degradation.
- When a signal with much jitter is reproduced on a VCR or special-effect playback is performed, the upper part of the picture or the picture itself may be erased or distorted.

Connecting to Hi-Vision Devices

Before connection, be sure to turn off both the projector and Hi-Vision devices.

- Read the manual which comes with each Hi-Vision device thoroughly.
- Use separately available BNC cables and audio cables to connect Hi-Vision devices.

To AUDIO (R)

To AUDIO (L)

Audio cable (separately available)

To VIDEO

To Y

To Pb/B-Y

To Pr/R-Y

BNC cable (separately available)

Hi-Vision devices

- W-VHS VCR
- Text/video camera
- Hi-Vision video camera

To select the proper audio input for video input

The video input terminal (AV IN input terminal) can be switched with the VIDEO button. However, since this projector has only a single audio input terminal, reconnect audio input in accordance with the AV device to be used.

Memo

- Other devices with component signal output terminals (DVD player (NTSC), etc.) can be connected. (*DVD: Digital Video Disc)
- DTV-format signals (480i, 480p, 720p, 1080i) can be input. For DTV-format signals that can be handled, refer to page 69.

Connecting to Various Devices (Cont.)

Connecting to Other Devices

Before connection, be sure to turn off both the projector and other devices to be connected.

- Read the manual thoroughly which comes with the device to be connected.
- Speakers with a built-in amplifier and game devices can be connected. Use the AV connection cable and audio cable supplied, or the cable supplied with a game device.

Connecting to Devices which Control the Projector

Before connection, be sure to turn off both the projector and devices to be connected.

- Read the manual thoroughly which comes with each device to be connected.
- By connecting a computer to the RS-232C terminal, you can control the projector. Also, you can make an infrared remote sensor extension unit and connect it to the REMOTE terminal of the projector.
- * Obtain connection cables as required.
- * For details, consult a authorized your dealer or service center.

ENGLISH

Connecting to Various Devices (Cont.)

Connecting to Computer Devices

Before connection, be sure to turn off both the projector and computer devices.

- Read the manual which comes with each device thoroughly.
- **Connection to an IBM PC or IBM-compatible computer**
- Use the supplied computer connection cable. Also, prepare cables required for connecting the devices connected.

Connecting to Various Devices (Cont.)

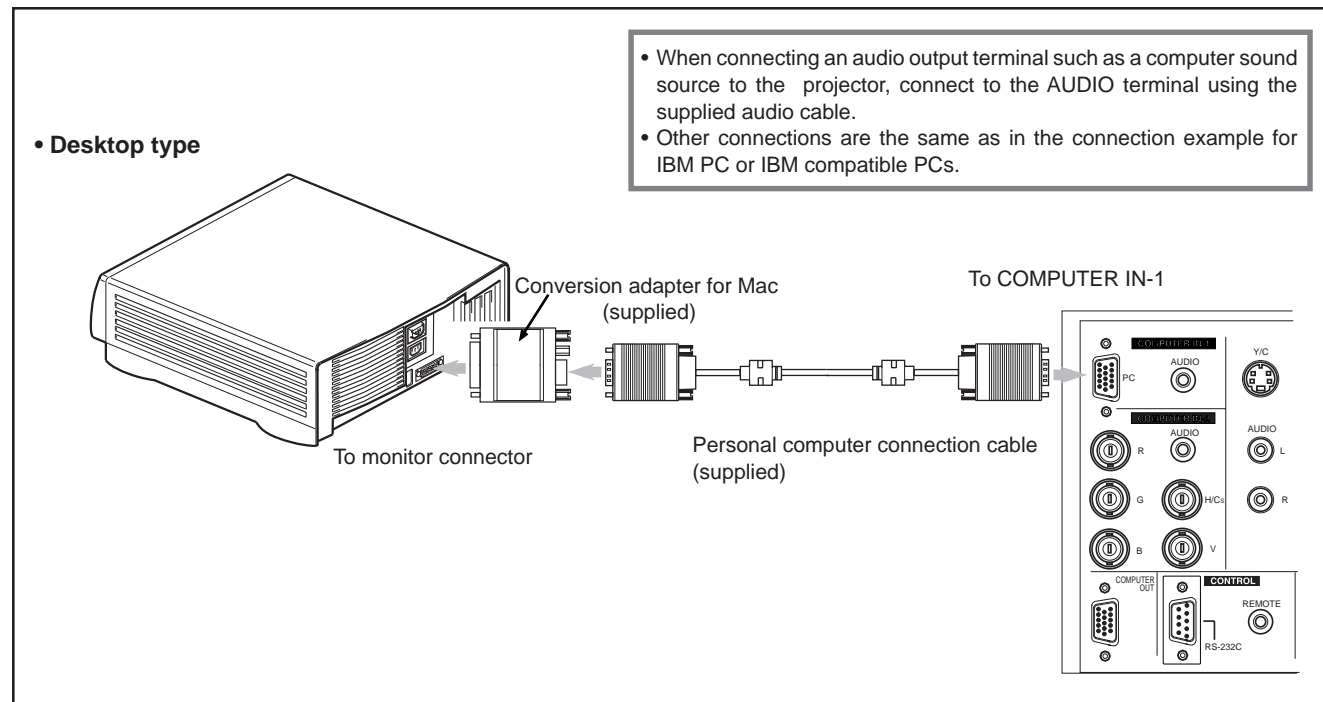

Connecting to Computer Devices (Cont.)

Before connection, be sure to turn off both the projector and computer devices.

- Read the manual which comes with each device thoroughly.

■ Connection to Macintosh

- Use the supplied Personal computer connection cable and the supplied conversion adapter for Mac.

Connecting to Various Devices (Cont.)

Connecting the Power Cord (Supplied)

After all devices have finished being connected, connect the projector's power cord. At this time, do not turn on the MAIN POWER switch yet.

- 1 Insert the supplied power cord into the power input terminal (AC IN ~) of the projector.

- 2 Insert the plug of the supplied power cord into a wall outlet.

CAUTION

To prevent fire and electric shock, observe the following:

- When you do not use devices, pull out their power cords from wall outlets.
- Do not connect the devices with power cords other than supplied.
- Do not use voltage other than the power voltage indicated.
- Do not scar, damage, or work on the power cords. Also, do not put a heavy object on, heat or pull the power cords, otherwise they may be damaged.
- Do not insert or pull out the plugs with a wet hand.

CAUTION

- Since the power requirement of the projector is high, be sure to insert the power plug directly into a wall outlet.

■ To use the projector

- Remove the lens cap.

* The lens cap has a string attached and it is fixed to the projector.

Be sure to fit lens cap when not in use.

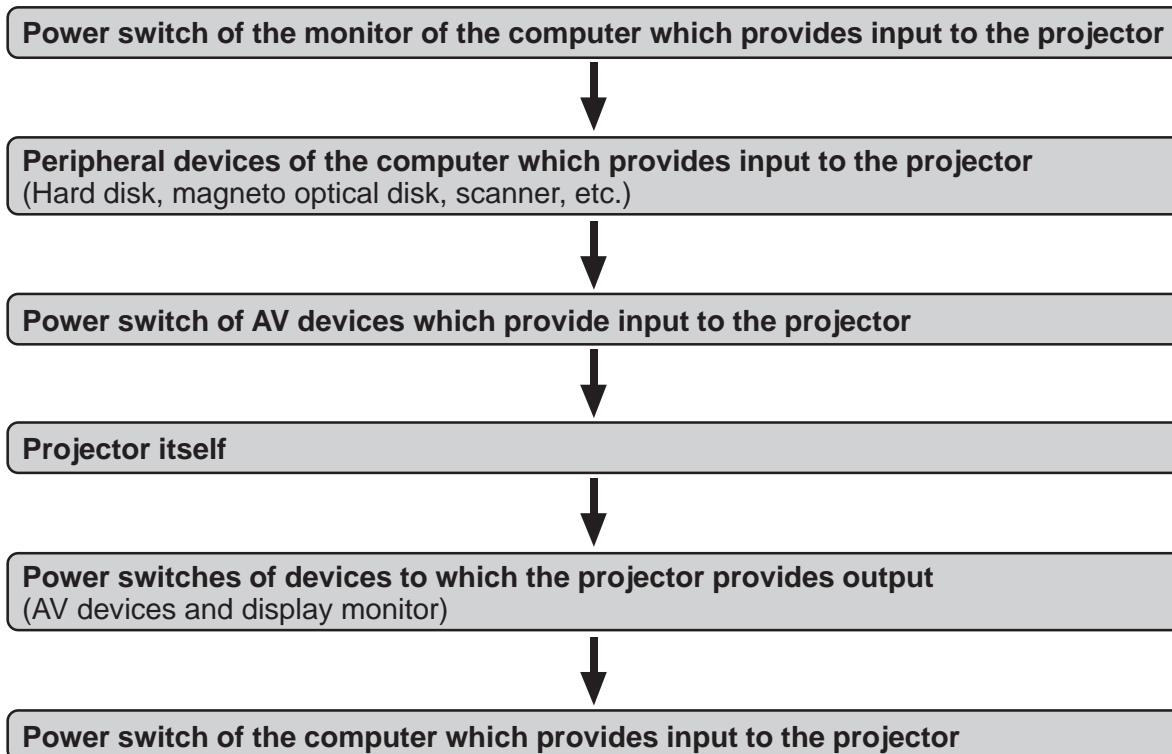

Connecting to Various Devices (Cont.)

When Turning On the Devices Connected to the Projector

Turn on the switches of the projector and the devices connected in the following order.
Skip over unconnected devices if there is any.

* When turning off the power switches, do so in the reverse order.

Memo

When the OPERATE button is pressed but the power is not supplied:

- If the filter or lamp replacement opening cover is displaced, the power is not supplied. Check them for correct installation.
- You must press the OPERATE button for one second or more.

CAUTIONS and NOTES

Do not turn off the MAIN POWER switch suddenly while the projector is being used or immediately after it has been used. This could cause a malfunction.

- Since the projector uses a high-intensity lamp and is heated to high temperature, cooling fans are operating even during projection. So, after use, the cooling fans continue to run from when the OPERATE button is pressed until the light-source lamp is cooled down. During cooling, the STAND BY indicator blinks to alert the cooling fans are running. During this time, do not turn off the main power switch. After the cooling of the light-source lamp is finished (the fans stop) and the STAND BY indicator comes on, then turn off the main power switch.
- If you press the OPERATE button immediately after the light-source lamp lights, it takes about 40 seconds for the lamp to go off. To turn the lamp on again, wait 10 seconds or more before pressing the OPERATE button.

When the TEMP indicator lights, the power turns off automatically.

- While the light-source lamp is on, if an abnormal temperature rise is detected, the TEMP indicator comes on, the power is automatically cut off, and the projector's EMERGENCY indicator blinks (goes into an emergency mode).

When the EMERGENCY indicator blinks, turn off the main power switch after the fans have stopped running.

- If the following abnormality occur to the projector, it goes into an emergency mode (the EMERGENCY indicator blinks).
When the projector goes into an emergency mode, it stops projecting automatically and runs the fans for about 20 seconds.
 - When the filter is dislodged.
 - When the filter is clogged.
 - When the light-source lamp suddenly goes off.
 - When the fans stop running.
 - When the temperature inside rises abnormally high.
- When the projector goes into an emergency mode:
After the fans have stopped, turn off the MAIN POWER switch and pull out the power cord. After that, re-insert the power cord and try to operate the projector. If it goes into emergency again, after the fans have stopped, turn off the main power switch, pull out the power cord, and consult your authorized dealer or service center for repair.

Basic Operations

■ Projector's buttons

The following describes the basic procedure for normal use of the projector.

1. Turning on the Power

1 Turn on the MAIN POWER switch.

ON [I]: The main power turns on and the STAND BY indicator comes on.

Projector's indicator

2 Press the OPERATE button for one second or more.

- The OPERATE indicator comes on.
- About 30 seconds after the MAIN POWER switch is turned on, you can start projecting.

Remote control unit

or

Projector

Notes

- After the power is turned on, the screen may be jumbled for a few seconds, but this is not a malfunction.
- If the light-source lamp does not light up, try to press the OPERATE button for more than a second again.

■ Turning off the Power

1 Press the OPERATE button for one second or more.

- The STAND BY indicator changes to blinking, and the projector goes into cool-down mode.

Example of the projector's button

Projector

2 Turn off the MAIN POWER switch after the STAND BY indicator changes to steady on.

OFF [O]: The MAIN POWER switch turns off and the STAND BY indicator goes off.

Projector

* Do not turn off the MAIN POWER switch during cool down mode (the STAND BY indicator blinking). Turn it off after the STAND BY indicator becomes on (stand-by mode).

Basic Operations (Cont.)

■ Projector's buttons

■ Remote control unit

ATTENTIONS

- **DO NOT** give any shock to this projector while operating it; otherwise, the light-source lamp goes off (the EMERGENCY indicator lights up).

If the shock turns off the light-source lamp —
Turn off the power by pressing the MAIN POWER switch, then turn it on again. Now you can operate the projector as usual.

2. Select the video input to be projected

- Press the VIDEO button or the COMPUTER button to switch the input.

- Each time you press either button, the selected input changes as follows.

- When you press VIDEO:

- When you press COMPUTER:

Remote control unit

Projector

Screen display

- * When the input is switched, the line display (ex. VIDEO) and the source display (ex. NTSC(480i)) are shown on the upper part of the screen (they disappear in about five seconds). However, they will not be shown if LINE DISPLAY in "Setting and Adjusting Other Functions (OPTIONS)" on page 44 is set to OFF. (For setting the source, see page 47.)

Also, when a channel is set, the channel display is shown on the upper right corner of the screen. (For setting up channels, see page 31, 49 and 54.)

Note

- To select the proper audio input for video input

The video input terminal (AV IN input terminal) can be switched with the VIDEO button. However, since this projector has only a single audio input terminal, reconnect audio input in accordance with the AV device to be used.

3. Adjust the screen size

- Adjust the screen size with the remote control's ZOOM (T/W) buttons.

- To enlarge the screen size:

Press the ZOOM (W) button.

- To reduce the screen size:

Press the ZOOM (T) button.

Remote control unit

Note

- The adjustment of the screen size (zoom adjustment) can also be made on the setting menu.
For operating the setting menu, refer to "Making Basic Settings" on page 32.

Basic Operations (Cont.)

■ Remote control unit

4. Adjust focus

■ Adjust focus with the remote control's FOCUS (+/-) buttons.

■ To focus on farther points:

Press the FOCUS (+) button.

■ To focus on nearer points:

Press the FOCUS (-) button.

Remote control unit

Note

- Focus adjustment can also be made on the setting menu. For operating the setting menu, refer to "Making Basic Settings" on page 32.

5. Adjust sound volume

■ Adjust sound volume with the remote control's VOL. (+/-) buttons.

■ When you press the VOL. (+) button:

The sound volume becomes higher. (0 → 50)

■ When you press the VOL. (-) button:

The sound volume becomes lower. (50 → 0)

- When you press either button, the corresponding AUDIO-VOL. level is displayed on the screen (the display will disappear in about five seconds).

Remote control unit

Screen display

Note

- Sound volume can be adjusted on the setting menu. For operating the setting menu, refer to "Making Basic Settings" on page 32.

Basic Operations (Cont.)

■ Remote control unit

● For Operating Other Functions

- **To turn off video image and audio sound temporarily**
Press the AV MUTING button.

- **Press once:**

Video image and audio sound turn off (do not come out).

- **Press again:**

Video image and audio sound come out again.

Remote control unit

- **To use the quick alignment function**

The quick alignment function is used to automatically adjust (set) the screen settings of "TRACKING, PHASE, H. POS. and V. POS." of computer system input video.

- Use either the remote control's or projector's button.

- **When using the remote control unit:**

Press the QUICK ALIGN. button.

- **When using the projector:**

Clear the menu display, and press the projector's QUICK ALIGN. "+ ►" and "◄ -" buttons at the same time.

* During the automatic adjustment, "QUICK-ALIGNMENT" appears on the screen and disappears automatically after the adjustment is completed.

■ Projector's button

Remote control unit

Projector

Screen display

Note

- This function works only for computer system inputs.
It does not work for AV inputs.

CAUTION

- **When performing automatic adjustment using the quick alignment function:**
Use a bright, still-picture screen. It may not function correctly on a dark or motion-picture screen.
If the condition adjusted by using the quick alignment function is not good, manually adjust TRACKING, PHASE, H. POS. and V. POS. (see pages 32, 38 and 39).

Basic Operations (Cont.)

■ Projector button

■ To display the SETTING menu

The setting menu is used to make basic adjustments and settings (TRACKING, PHASE, H. POS., V. POS., FOCUS, ZOOM and AUDIO-VOL.) of the video picture being projected after installation (connection) or after inputs are switched. For operating the setting menu, refer to “Making Basic Settings” on page 32.

- **Press the projector's SETTING button.**

The setting menu is displayed on the screen.

Projector

■ To display the MAIN menu

The main menu is used to adjust or set the projected video picture and the projector's condition, etc. (PIXEL CLOCK, POSITION, PICTURE, SOUND, OPTIONS, SOURCE, CHANNEL, USER SOURCE SETUP, DISPLAY SIZE, DECODER and LANGUAGE). For operating the main menu, refer to pages 35 to 59.

- **Press the remote control's MENU/ENTER button.**

The main menu appears on the screen.

Remote control unit

■ Remote control unit

Note

- **To change the menu language displayed**

English is set when the projector is shipped from the factory. The language displayed can be selected from the following six languages: 日本語 (Japanese), ENGLISH, DEUTSCH (German), ESPAÑOL (Spanish), ITALIANO (Italian), and FRANÇAIS (French). However, some displays such as “Channel”, “User Source Setup”, “Display Size” and “Quick Alignment” are shown only in English. Proper nouns such as line and source displays are similarly treated.

■ To use the remote control's PRESET button

The PRESET button is used for adjustments made on the main menu or setting menu.

- **When resetting only the selected settings to the factory-set values, press the remote control's PRESET button.**

Only the selected item's setting is reset to the factory-set value.

Remote control unit

Notes

- This button works only for numeric values. It does not work for switching between ON and OFF.
- For items such as PIXEL CLOCK (TRACKING and PHASE), POSITION (H. POS. and V. POS.), SOUND (TREBLE and BASS), both settings are reset at the same time.

Basic Operations (Cont.)

■ Remote control unit

PAGE BACK button

■ To display “CHANNEL”

When no menu is displayed, pressing PAGE BACK button will show the channel now being used on the upper right corner of the screen.

Also, the channel can be switched to another channel. For details, refer to “Changing Channels” (page 54).

- When no menu is shown, press PAGE BACK button on the remote control.
The channel is displayed on the upper right corner of the screen.

Remote control unit

Note

- Before you can operate the projector, channels must be set up beforehand. For details, refer to “Setting up Channels” on page 49.

Operating the Setting Menu

Making Basic Settings

■ Projector's buttons

■ Setting menu

Adjustment • setting level

Description of adjustment and setting items

- TRACKING** : If wide vertical stripes appear on the screen, adjust the lateral video size and display area so that they disappear. (–255 ↔ 0 ↔ +255)
- PHASE** : If characters on the screen flicker or become dim, adjust so they become clear. (–127 ↔ 0 ↔ +127)
- H. POS.** : If the screen position is displaced to the right or left, adjust the horizontal position of the screen. (–255 ↔ 0 ↔ +255)
- V. POS.** : If the screen position is displaced upward or downward, adjust the vertical position of the screen. (–120 ↔ 0 ↔ +120)
- FOCUS** : Adjust the focus of video picture.
–: Focuses on near points.
+: Focuses on farther points.
- ZOOM** : Adjust the screen size (angle of view).
T : Becomes smaller.
W : Becomes larger.
- AUDIO-VOL.** : Adjust the sound level. (0 ↔ 50)

Here, we make basic video adjustment and sound volume adjustment which are set up after installation (connection).

Notes

- This adjustment menu (setting menu) can be displayed with only the projector's button. After displaying the setting menu, you can select or set (adjust) items with cursor buttons on the remote control unit.
- If settings and connections are changed, adjust and set those items again.
- After this adjustment (setting menu), if video picture adjustment is necessary by using the devices connected, perform the details setting and adjustment on the main menu (pages 35 to 59).
- For computer-related inputs, use of the quick alignment function allows automatic adjustment of TRACKING, PHASE, H. POS. and V. POS. (See pages 29, 38 and 39).

1 Press the SETTING button of the projector.

- The setting menu is displayed on the screen.

2 Press the SETTING button to select the desired item.

- The selected item is shown in magenta color. Each time you press the button, the selected item changes as follows:

Memo

To select items using the remote control unit:

Items can be selected using the cursor buttons ▲ (backward) or ▼ (forward) on the remote control unit. In this case, menu clearing in the above order is not available. The selection changes from AUDIO-VOL to TRACKING directly.

3 Adjust and set the selected item using the QUICK ALIGN. buttons +► or ◀–.

- To adjust and set multiple items, repeat steps 2 and 3.
- To reset the adjustment value of the selected item (TRACKING, PHASE, H. POS. or V. POS.) to the factory-set value, press the remote control's PRESET button. This button does not work for focus, zoom or sound volume.

Memo

To adjust and set items using the remote control unit:

Items can be adjusted and set using the cursor buttons ◀ or ▶ on the remote control unit.

4 Clear the setting menu by pressing the SETTING button repeatedly.

Memo

To clear the setting menu using the remote control unit:

You can also clear the setting menu by pressing the PAGE BACK button on the remote control unit.

Memo

Using the quick alignment function:

This function works only for computer-related signals inputted. Press the remote control's QUICK ALIGN. button, or after clearing the menu displayed, press the projector's QUICK ALIGN. buttons +► and ◀– at the same time. TRACKING, PHASE, H. POS. and V. POS. are automatically adjusted.

During the adjustment, "QUICK ALIGNMENT" appears on the screen, and disappears after the adjustment finishes.

Operating the Main Menu

Configuration the Main Menu (AV Input) For computer inputs, see the following page.

You can adjust video quality (PICTURE), audio quality (SOUND), etc. using the menus.

The menus are configured as follows:

Main menu (AV inputs : During AV IN input signal)

PIXEL CLOCK	TRACKING	: Normally, no adjustment is required. The lateral size and display area of video image are adjusted.
	PHASE	: Normally, no adjustment is required. Flickering or dim video image is adjusted.
POSITION	V. POS.	: The vertical position of the video image being projected is adjusted.
	H. POS.	: The horizontal position of the video image being projected is adjusted.
PICTURE	BRIGHTNESS	: The brightness of the video image being projected is adjusted.
	CONTRAST	: The contrast of the video image being projected is adjusted.
	SHARPNESS	: The sharpness of the video image being projected is adjusted.
	COLOR	: The color density of the video image being projected is adjusted.
	TINT	: The tint of the video image being projected is adjusted. (Displayed only for NTSC signal)
	ALL RESET	: All the items adjusted are reset.
SOUND	TREBLE	: The treble of the audio sound being input is adjusted.
	BASS	: The bass of the audio sound being input is adjusted.
OPTIONS	MENU AUTO OFF	: Sets whether to turn off menu display automatically (YES) or not (NO).
	LINE DISPLAY	: Sets whether to make the line display effective (ON) or not (OFF) for about 5 seconds after input switching.
	RIGHT LEFT REV.	: Video image is reversed right-to-left (for upside-down hanging (ceiling)).
	TOP BOTTOM INV.	: Video image is inverted top-to-bottom (for upside-down hanging (ceiling)).
	CLAMP	: Sets the clamp pulse's position at the back porch (BP) or on the sink tip (ST). Normally, the clamp pulse is used at BP. If, with some PCs or workstations, the screen becomes unstable such as being too dark or too bright, try to switch to ST.
	RESIZE	: Does not work with AV (video) input. (RESIZE is shown in gray.)
	BACK COLOR	: Specifies the background color when there is no video signal. Background color can be selected from BLUE, CYAN, BLACK, GREEN, MAGENTA, RED, and YELLOW.
	COLOR TEMP.	: Adjusts the color temperature of the image being projected. Make adjustment when the image becomes reddish or bluish. Color temperature can be set to LOW, MIDDLE, or HIGH.
	ASPECT CHANGE	: Selects the vertical-to-horizontal ratio of the image projected. The factory-set ratio is 4 : 3. When projecting high-vision video image, a ratio of 16 : 9 can be selected.
	SLEEP TIME	: Sets the length of sleep time. A set sleep time after input signal is depleted, the projector goes into a stand-by state. Sleep time can be selected from 10, 20, 30, 60 and 0 minutes. (If you select 0 minutes, the sleep time will be cleared.)
	LAMP TIME	: Indicates the accumulated used hours of the light-source lamp.
SOURCE	: Normally used in AUTO. If use in AUTO is unstable such as color not appearing, the screen being disturbed or the screen being intermitted, set to the dedicated source (forced mode) in accordance with the input signal.	
CHANNEL	: A line, multiple sources and a switcher number can be registered to a channel. Up to 10 channels can be set. Registered channels can be recalled by direct channel switching.	
USER SOURCE SETUP	: When handling some signals that are delicately different in horizontal/vertical frequency from video signals that can be input to the projector, you can assign names to them for easy selection. Up to 10 such signals can be registered.	
DISPLAY SIZE	: This does not work for AV (video) input signals. (Adjustment items are displayed in gray color.)	
DECODER	: Normally, set to AUTO. The color system of an input signal is automatically identified and shown in (). When use in AUTO is unstable such as no color being shown, set the dedicated color system in accordance with the input signal. You can select from AUTO, NTSC(480i), NTSC4.43, PAL, and SECAM.	
LANGUAGE	: Text on the screen can be changed to a language other than English. Languages that can be displayed are the following six : 日本語 (Japanese), ENGLISH, DEUTSCH (German), ESPAÑOL (Spanish), ITALIANO (Italian), and FRANÇAIS (French). However, some displays such as "Channel", "User source setup", "Display size" and "Quick alignment" are shown only in English.	

Operating the Main Menu (Cont.)

Configuration of the Main Menu (Computer-related input)

Main menu (Computer-related inputs : During COMPUTER IN-1 or -2 input signal)

PIXEL CLOCK	TRACKING	: The lateral size and display area of video image are adjusted.
	PHASE	: Flickering or dim video image is adjusted.
POSITION	V. POS.	: The vertical position of the video image being projected is adjusted.
	H. POS.	: The horizontal position of the video image being projected is adjusted.
PICTURE	BRIGHTNESS	: The brightness of the video image being projected is adjusted.
	CONTRAST	: The contrast of the video image being projected is adjusted.
	R-GAIN	: The gain in red signal of the video image being projected is adjusted.
	G-GAIN	: The gain in green signal of the video image being projected is adjusted.
	B-GAIN	: The gain in blue signal of the video image being projected is adjusted.
	TEXT MODE	: Adjust easiness for reading text during RESIZE. NORMAL : Normal TEXT 1 : Display the outline of small letters already. TEXT 2 : Makes the outline of large letters sharp.
	ALL RESET	: All the items adjusted are reset.
SOUND	TREBLE	: The treble of the audio sound being input is adjusted.
	BASS	: The bass of the audio sound being input is adjusted.
OPTIONS	MENU AUTO OFF	: Sets whether to turn off menu display automatically (YES) or not (NO).
	LINE DISPLAY	: Sets whether to make the line display effective (ON) or not (OFF) for about 5 seconds after input switching.
	RIGHT LEFT REV.	: Image is reversed right-to-left (for upside-down hanging (ceiling)).
	TOP BOTTOM INV.	: Image is inverted top-to-bottom (for upside-down hanging (ceiling)).
	CLAMP	: Sets the clamp pulse's position at the back porch (BP) or on the sink tip (ST). Normally, the clamp pulse is used at BP. If, with some PCs or workstations, the screen becomes unstable such as being too dark or too bright, try to switch to ST.
	RESIZE	: When the number of pixels (resolution) sought by the video image input is smaller than that (resolution) of D-ILA device, the video image is then enlarged to a virtually full screen size of D-ILA device and projected. (Resizing indication)
	BACK COLOR	: Specifies the background color when there is no image signal. Background color can be selected from BLUE, CYAN, BLACK, GREEN, MAGENTA, RED, and YELLOW.
	COLOR TEMP.	: Adjusts the color temperature of the video image being projected. Make adjustment when the video image becomes reddish or bluish. Color temperature can be set to LOW, MIDDLE, or HIGH.
	ASPECT CHANGE	: Selects the vertical-to-horizontal ratio of the video image projected. The factory-set ratio is 4 : 3. When projecting high-vision image, a ratio of 16 : 9 can be selected.
	SLEEP TIME	: Sets the length of sleep time. A set sleep time after input signal is depleted, the projector goes into a stand-by state. Sleep time can be selected from 10, 20, 30, 60 and 0 minutes. (If you select 0 minutes, the sleep time will be cleared.)
	LAMP TIME	: Indicates accumulated used hours of the light-source lamp.
SOURCE	: Normally used in AUTO. If use in AUTO is unstable such as color not appearing, the screen being disturbed or the screen being intermitted, set to the dedicated source (forced mode) in accordance with the input signal.	
CHANNEL	: A line, multiple sources and a switcher number can be registered to a single channel. Up to 10 channels can be set. Registered channels can be recalled by direct channel switching.	
USER SOURCE SETUP	: When handling some signals that are delicately different in horizontal/vertical frequency from video signals that can be input to the projector, you can assign names to them for easy selection. Up to 10 such signals can be registered.	
DISPLAY SIZE	: This works to adjust the image display size of input signals (sources), such as "horizontal effective dots (H PIXEL)", "vertical effective dots (V PIXEL)", "horizontal display position (H CENTER)" and "vertical display position (V CENTER)".	
DECODER	: Does not work with computer-related inputs. (The color system is indicated in gray.)	
LANGUAGE	: Text on the screen can be changed to a language other than English. Languages that can be displayed are the following six : 日本語 (Japanese), ENGLISH, DEUTSCH (German), ESPAÑOL (Spanish), ITALIANO (Italian), and FRANÇAIS (French). However, some displays such as "Channel", "User source setup", "Display size" and "Quick alignment" are shown only in English.	

Operating the Main Menu (Cont.)

Operating the Main Menu (Basic Operation of the Main Menu)

■ Remote control unit

For projector's menus, the setting menu and the main menu are available.

Here, we explain about the operation of the main menu.

For the setting menu, refer to "Making Basic Settings" on page 32.

1 Press the MENU/ENTER button.

- The main menu is displayed on the screen.

2 Select an item with the cursor button ▲ or ▼.

- The selected item (displayed text) is shown in magenta color on the screen.

3 Set (adjust) the item.

■ When you have selected DECODER or LANGUAGE,

- Set it with the cursor button ◀ or ▶.
- * To finish the main menu, press the PAGE BACK button.

■ When you have selected an item on the submenu,

- Press the MENU/ENTER button to display the submenu, then set (adjust) the item with the cursor buttons ◀ / ▶ or ▲ / ▼.
- * To return to the main menu, press PAGE BACK again. (To finish the main menu from the submenu, press PAGE BACK twice.)

■ Main menu

(Example: During video signal input)

Note

- Signal names shown in the source display are uniquely given to specific horizontal and vertical frequencies and do not necessarily represent the indication or type of input signals. For example, when AUTO is selected, the horizontal and vertical frequency signals of the signal being input are detected, and the matching name is shown in (). (Display example: "AUTO (NTSC (480i))") As mentioned above, remember that the source display does not necessarily correspond to the indication or type of input signals.

■ About main menu display:

Line display: The selected input-mode designation is displayed. For input-mode designation, "Y/C", "VIDEO", "YPBPR", "COMP 1" and "COMP 2" are available.

Source display: The type of the signal being input is displayed. The signal name to display can be selected from a submenu, "Source Setup", AUTO mode, dedicated mode (forced mode) or USER mode can be selected.

Channel display: The channel selected by the user is displayed. Channels have lines, sources and switcher numbers registered. By specifying a registered source, the user can switch to the source and line which he has set up. If you are using a switcher, you can also specify switcher numbers. For details, see pages 49 to 53.

Submenu item display:

- PIXEL CLOCK : See page 38.
- POSITION : See page 39.
- PICTURE : See pages 40~42.
- SOUND : See page 43.
- OPTIONS : See pages 44~46.
- SOURCE : See pages 47 and 48.
- CHANNEL : See pages 49~55.
- USER SOURCE SETUP : See pages 56 and 58.
- DISPLAY SIZE : See page 59.

Decoder (Color system) display: See page 36.

Language display : See page 37.

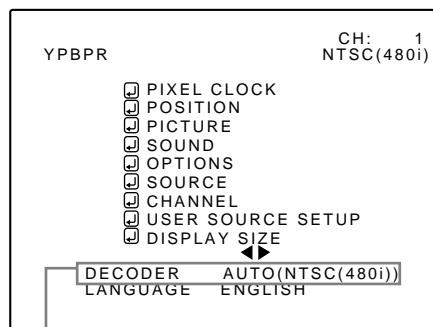

Operating the Main Menu (Cont.)

Changing the Color System

■ Remote control unit

■ Main menu

Color system (DECODER) display

Note

- When computer-related signal is input, the display of the color system is changed to gray color, making operation impossible. When video signals from AV devices are input, the item for the color system can be set.

AUTO is set for the color system when the projector is shipped from the factory. Normally, use it in AUTO. If operation in AUTO is unstable such as with color not being shown, set to a dedicated color system in accordance with the color system of the signal being input.

1 Press the MENU/ENTER button.

- The main menu is shown on the screen.

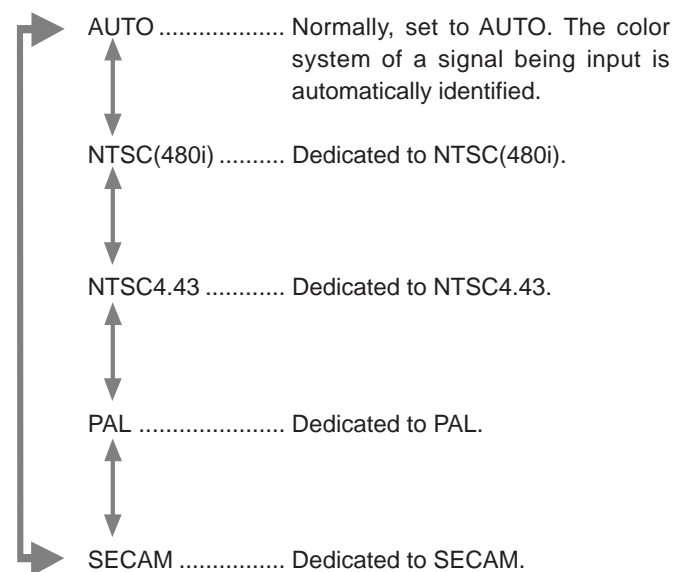

2 Select "DECODER" with the cursor button ▲ or ▼.

- The selected item (displayed in text) is shown in magenta color on the screen.

3 Set the color system with the cursor button ◀ or ▶.

- Each time you press the cursor button ◀ or ▶, the color system changes as follows.

▶ : Forward / ◀ : Backward

Memo

About automatic signal identification

- AUTO is selected when shipped from the factory. In AUTO, the color system (DECODER) of the signal being input is automatically identified and indicated in (). (Display example: "AUTO(NTSC(480i))")
- If operation in AUTO is unstable such as with color not being shown, set to a dedicated color system in accordance with the color system of the signal being input. When the dedicated color system is set, be careful as automatic identification does not work.

- To finish the main menu, press the PAGE BACK button.

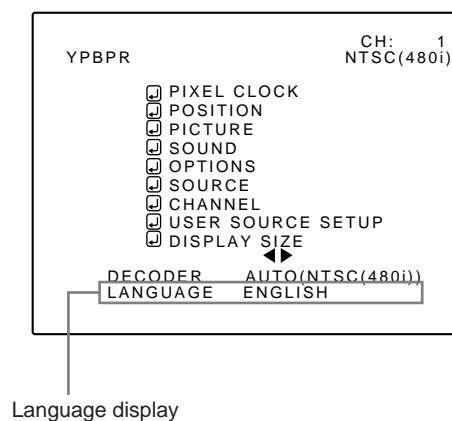

Operating the Main Menu (Cont.)

Changing the Language Display

■ Remote control unit

■ Main menu

Note

- The selected item is shown in magenta color. Items shown in gray cannot be operated or set in the current mode.

The language in the menu display is set to English when shipped from the factory. When you want to change to another language, set it as follows.

1 Press the MENU/ENTER button.

- The main menu is shown on the screen.

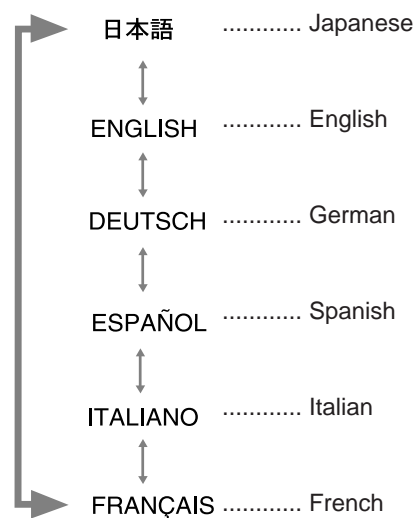

2 Select “LANGUAGE” with the cursor button ▲ or ▼.

- The selected item (displayed in text) is shown in magenta color on the screen.

3 Set the desired language with the cursor button ◀ or ▶.

- Each time you press the cursor button ◀ or ▶, the selected language changes as follows.

▶ : Forward / ◀ : Backward

Memo

About language display

English is selected when the projector is shipped from the factory. The languages in the menu display are the following six : 日本語 (Japanese), ENGLISH, DEUTSCH (German), ESPAÑOL (Spanish), and FRANÇAIS (French).

However, some displays such as “Channel”, “User Source Setup”, “Display Size” and “Quick Alignment” are shown only in English. Proper nouns such as line and source displays are similarly treated.

● To finish the main menu, press the PAGE BACK button.

ENGLISH

Operating the Main Menu (Cont.)

Adjusting the Pixel Clock

■ Remote control unit

The pixel clock should be adjusted mainly for computer-related inputs. (Normally, it does not need to be adjusted for video inputs.) If a wide stripe appears on the screen, adjust the lateral size of video image and the display area (tracking adjustment) so the stripe disappears. Also, if text on the video screen appears flickering or dim, make adjustment so it becomes clear (phase adjustment).

1 Press the MENU/ENTER button.

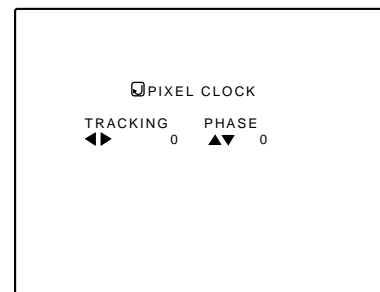

- The main menu appears on the screen.

2 Select "PIXEL CLOCK" with the cursor button ▲ or ▼.

- The selected item (displayed in text) is shown in magenta color on the screen.

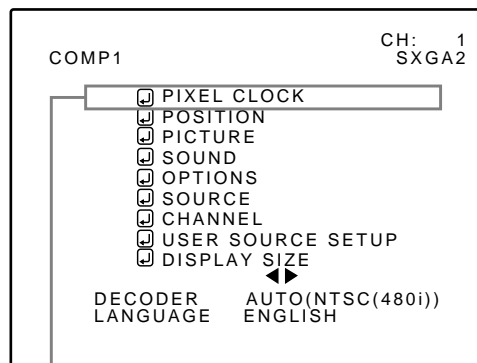

3 Press the MENU/ENTER button.

- The submenu items of the PIXEL CLOCK menu appear on the screen.

(PIXEL CLOCK menu)

■ Main menu

Submenu item (PIXEL CLOCK)

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- A dim screen could be caused by insufficient adjustment of brightness and contrast. Before adjusting phase, make sure that brightness and contrast are correctly adjusted.

4 Adjust "TRACKING" and "PHASE" with the cursor buttons.

- Adjust the tracking and phase of the video screen being projected. To adjust the phase, first check for correct tracking adjustment.

Adjustment item	Button	Adjustment content
TRACKING	◀	The screen shrinks laterally (right-to-left). (−255 ← 0 ← +255)
	▶	The screen extends laterally (right-to-left). (−255 → 0 → +255)
PHASE		Set to a position where text appears clear.
	▲	(−127 → 0 → +127)
	▼	(−127 ← 0 ← +127)

* To reset to the factory-set adjustment values, press the remote control's PRESET button.

Tracking and phase are reset to the factory-set adjustment values.

● To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

- To finish the menu display from the submenu display (PIXEL CLOCK menu), press PAGE BACK twice.

Operating the Main Menu (Cont.)

Adjusting the Screen Position

■ Remote control unit

Adjust the position of the screen if it is displaced.

1 Press the MENU/ENTER button.

- The main menu appears on the screen.

2 Select “POSITION” with the cursor button ▲ or ▼.

- The selected item (displayed in text) is shown in magenta color on the screen.

3 Press the MENU/ENTER button.

- The submenu items of the POSITION menu appear on the screen.

(POSITION menu)

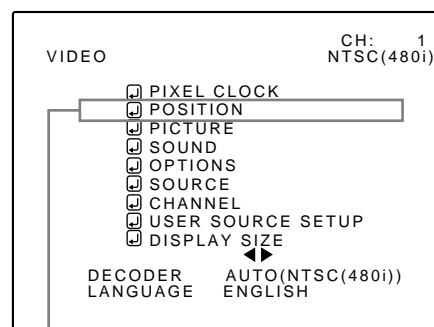

4 Adjust “H. POS.” and “V. POS.” with the cursor buttons.

- Adjust the horizontal and vertical positions of the video picture screen being projected.

Adjustment item	Button	Adjustment content
H. POS.	◀	The screen moves to the left. (-255 ← 0 ← +255)
	▶	The screen moves to the right. (-255 → 0 → +255)
V. POS.	▲	The screen moves upwards. (-120 → 0 → +120)
	▼	The screen moves downwards. (-120 ← 0 ← +120)

* To reset to the factory-set adjustment values, press the remote control's PRESET button. H. POS. and V. POS. are reset to the factory-set adjustment values.

■ Main menu

Submenu item (POSITION)

Note

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.

● To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

- To finish the menu display from the submenu display (POSITION menu), press PAGE BACK twice.

Operating the Main Menu (Cont.)

Adjusting Picture Quality

■ Remote control unit

Adjust brightness, contrast, etc. so you have the desired screen. Adjustment items (on the PICTURE menu) are different when video-related signals are input and when computer-related signals are input.

1 Press the MENU/ENTER button.

- The main menu appears on the screen.

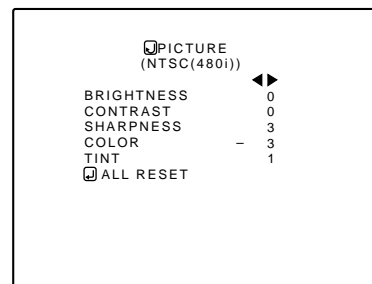

2 Select "PICTURE" with the cursor button ▲ or ▼.

- The selected item (displayed in text) is shown in magenta color on the screen.

3 Press the MENU/ENTER button.

- The submenu items of the PICTURE menu appear on the screen.

■ When AV signals are input

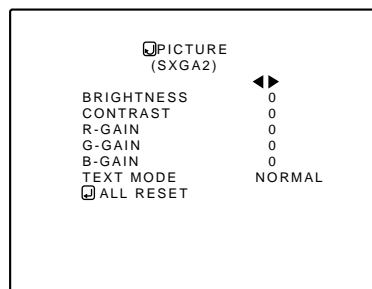

(PICTURE menu)

■ Main menu

Submenu item (PICTURE)

■ When computer-related signals are input

(PICTURE menu)

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Adjustment items (on the PICTURE menu) are different when AV signals are input and when computer-related signals are input.

4 Select the item to adjust with the cursor button ▲ or ▼.

- The items to adjust (shown in text) is displayed in magenta color.

Operating the Main Menu (Cont.)

Adjusting Picture Quality (Cont.)

■ Remote control unit

5 Make adjustment with the cursor button ◀ or ▶.

■ For video system input

- To adjust multiple items, repeat steps 4 and 5.
- To reset all items (to factory-set adjustment values "0"), select ALL RESET with the cursor buttons and press the MENU/ENTER button.
- To reset only the selected items (ALL RESET excluded) to the factory-set adjustment value, press the remote control's PRESET button. The selected item is reset to the factory-set adjustment value.

Adjustment item	Button	Adjustment content
BRIGHTNESS	◀	Gets darker. (-30 ← 0 ← +30)
	▶	Gets brighter. (-30 → 0 → +30)
CONTRAST	◀	Gets lower. (-30 ← 0 ← +30)
	▶	Gets higher. (-30 → 0 → +30)
SHARPNESS	◀	Gets softer. (0 ← 7)
	▶	Gets sharper. (0 → 7)
COLOR	◀	Gets softer. (-30 ← 0 ← +30)
	▶	Gets deeper. (-30 → 0 → +30)
TINT	◀	Gets reddish. (-30 ← 0 ← +30)
	▶	Gets greenish. (-30 → 0 → +30)
ALL RESET	MENU/ ENTER	Resets all adjustment values of items on the PICTURE menu to the factory-set values (0).

■ Submenu items

[PICTURE menu]

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Adjustment items (on the PICTURE menu) are different when AV signals are input and when computer-related signals are input.

Notes

- The adjustment item, TINT, is displayed only for NTSC system. It is not displayed (cannot be adjusted) when PAL or SECAM system signals are input.
- When video signals are input to the COMPUTER IN-2 terminal, adjustment items "COLOR" and "TINT" are indicated but cannot be adjusted.

■ For computer system input

- To adjust multiple items, repeat steps 4 and 5.
- To reset all items (to factory-set adjustment values "0"), select ALL RESET with the cursor buttons and press the MENU/ENTER button.
- To reset only the selected items (ALL RESET excluded) to the factory-set adjustment value, press the remote control's PRESET button. The selected item is reset to the factory-set adjustment value.

(To be continued on the next page)

Submenu items

[PICTURE menu]

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Adjustment items (on the PICTURE menu) are different when AV signals are input and when computer-related signals are input.

Note

- There is a relationship between the adjustment of items R-GAIN, G-GAIN, and B-GAIN and that of item CONTRAST. For example, when adjustment values are : R-GAIN: 0, G-GAIN: 5, B-GAIN: 0, and CONTRAST: 0, changing CONTRAST to 1 changes the adjustment values as follows: R-GAIN: 1, G-GAIN: 6, and B-GAIN: 1.

Also, when the adjustment value of any of R-GAIN, G-GAIN, and B-GAIN has reached -30 (minimum) or +30 (maximum), CONTRAST cannot be adjusted to any higher value. For example, when R-GAIN is 0, G-GAIN is 5, B-GAIN is 0, and CONTRAST is 0, increasing CONTRAST allows the other adjustment values to increase until R-GAIN: 25, G-GAIN: 30, and B-GAIN: 25, then CONTRAST becomes 25 and cannot be adjusted to any higher value.

- To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.**

- To finish the menu display from the submenu display (PICTURE menu), press PAGE BACK twice.

Operating the Main Menu (Cont.)

Adjusting Sound Quality

■ Remote control unit

Adjust the quality (treble/bass) of sound.

1 Press the MENU/ENTER button.

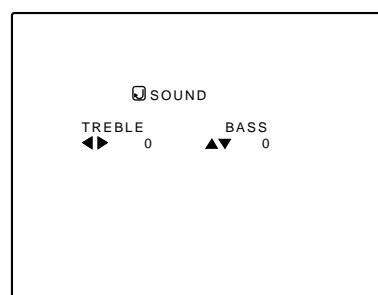

- The main menu appears on the screen.

2 Select the “SOUND” with the cursor button ▲ or ▼.

- The selected item (displayed in text) is shown in magenta color on the screen.

3 Press the MENU/ENTER button.

- The submenu items of the SOUND menu appear on the screen.

4 Adjust “TREBLE” and “BASS” with the cursor buttons.

- Adjust the quality (TREBLE and BASS) of sound.

Adjustment item	Button	Adjustment content
TREBLE	◀	Gets weaker. (-5 ← 0 ← +5)
	▶	Gets stronger. (-5 → 0 → +5)
BASS	▲	Gets stronger. (-5 → 0 → +5)
	▼	Gets weaker. (-5 ← 0 ← +5)

* To reset to the factory-set adjustment values, press the remote control's PRESET button. The treble and bass are reset to the factory-set adjustment values.

- To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

- To finish the menu display from the submenu display (SOUND menu), press PAGE BACK twice.

Setting and Adjusting Other Functions (OPTIONS) (Cont.)

Remote control unit

Submenu items

[OPTIONS menu]

OPTIONS	
MENU AUTO OFF	NO
LINE DISPLAY	ON
RIGHT LEFT REV.	OFF
TOP BOTTOM INV.	OFF
CLAMP	BP
RESIZE	ON
BACK COLOR	BLUE
COLOR TEMP.	MIDDLE
ASPECT CHANGE	4:3
SLEEP TIME	30 Min.
LAMP TIME	10 H.

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Items to be set (adjusted) are different when AV signals are input and when computer-system signals are input.

Adjustment item	Button	Adjustment content
BACK COLOR	◀/▶	Sets background color when there is no input signal. (Factory setting : BLUE) BLUE ↔ CYAN ↔ BLACK ↔ GREEN ↑ YELLOW ↔ RED ↔ MAGENTA ↓
COLOR TEMP.	◀/▶	Sets the color temperature of the video image being projected. Make adjustment when the image becomes reddish or bluish. (Factory setting : MIDDLE) LOW : Color temperature decreases (video image becoming reddish). MIDDLE : Results in middle color temperature. HIGH : Color temperature increases (video image becoming bluish). LOW ↔ MIDDLE ↔ HIGH
ASPECT CHANGE	◀/▶	Sets the vertical-to-horizontal ratio (4 : 3 or 16 : 9) of the video image projected. (Factory setting : 4 : 3) 4 : 3 : The aspect ratio of the screen becomes 4 : 3. Set it to 4 : 3 for video of NTSC, NTSC4.43, PAL, SECAM. 16 : 9 : The aspect ratio of the screen becomes 16 : 9. Set it to 16 : 9 for Hi-Vision devices (W-VHS VCR, etc.) 4 : 3 ↔ 16 : 9
SLEEP TIME	◀/▶	Sets the length of sleep time which automatically brings the projector into stand-by state. You can select one of the following sleep times : You can select one of the sleep times: 10, 20, 30, 60 and 0 minutes. (Factory setting: 30 minutes) 10 ↔ 20 ↔ 30 ↔ 60 ↔ 0 ↑ If you select 0 minutes, this function does not work

- To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

- To finish the menu display from the submenu display (OPTIONS menu), press PAGE BACK twice.

Note

- When you view a conventional (normal) 4 : 3 video picture, which is not wide video picture, on the projector's screen using the aspect change function, the upper and lower parts of the video picture become partially invisible. View such an original video picture in 4 : 3 mode, respecting the producer's intention.

Operating the Main Menu (Cont.)

Changing (Setting) the Source

■ Remote control unit

Normally, use the source setting in AUTO. If use in AUTO is unstable such as color not appearing, the screen being disturbed or the screen being intermitted, set to the dedicated source (forced mode) in accordance with the input signal.

Also, User Source mode, which lets you set up special signals, is available.

- When shipped from the factory, the source settings are as follows:

Input mode	Factory setting	Input mode	Factory setting
VIDEO	NTSC(480i)	COMP 1	AUTO
Y/C	NTSC(480i)	COMP 2	AUTO
YPBPR	AUTO	—	—

Notes

- Depending on the signal from a device connected, adjustment may be needed after a dedicated source is set. If that is the case, adjust the appropriate items.
- When the input mode (SOURCE) is VIDEO or Y/C, and if AUTO is set, the automatic detecting function may work, possibly causing the screen to be intermitted or disturbed. In that case, set to a dedicated source (forced mode).
- When special effect playback (fast-forward/ twice-speed/triple-speed) is performed on a video deck, etc, the picture may be disturbed or intermitted, depending on the device.
- When inputting 480p or 720p-DTV-format signal in COMP 2 input mode, use the dedicated source mode "SDTV(480p)" or "HDTV(720p)". (In AUTO, 480p or 720p signal can not be detected.)

1 Press the MENU/ENTER button.

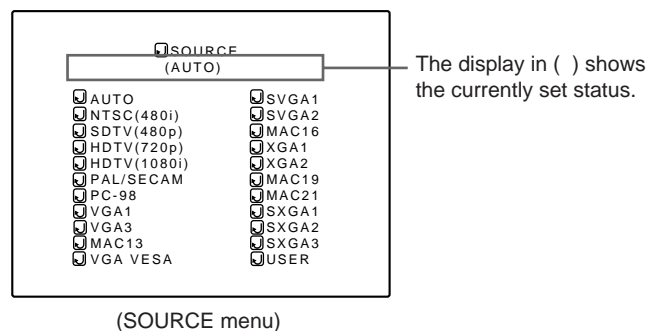

- The main menu appears on the screen.

2 Select a submenu item "SOURCE" using the cursor button ▲ or ▼.

- The SOURCE item (displayed in text) is indicated in magenta color.

3 Press the MENU/ENTER button.

- The submenu, SOURCE menu, appears on the screen.

4 Select the item to set using the cursor buttons ▲/▼ or ◀/▶.

- The item to set is shown in magenta color.

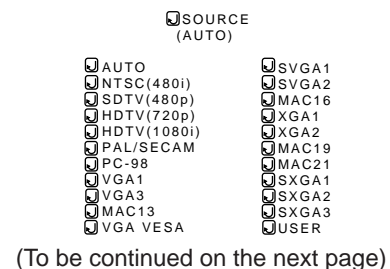

■ Main menu

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Items that can be set are different when video signals are input and when computer signals are input.
- For dedicated source signals (corresponding frequency, etc.) for computer signals, see page 19.

Operating the Main Menu (Cont.)

Changing (Setting) the Source (Cont.)

■ Remote control unit

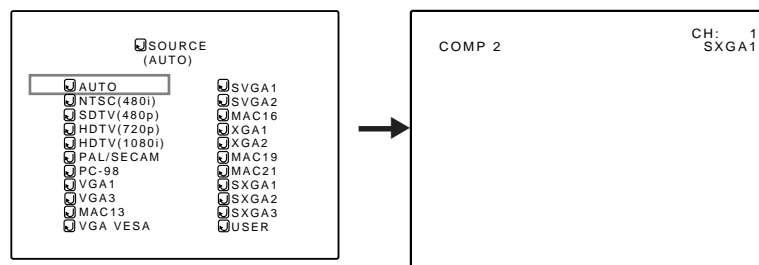

5 Press the MENU/ENTER button to set (fix) it.

■ When AUTO is selected:

The main menu is automatically cleared, completing the setting procedure, and the source display inputted appears.

- Both line display and source display appear on the screen and disappear in five seconds. However, they do not appear if the line display is set to OFF.

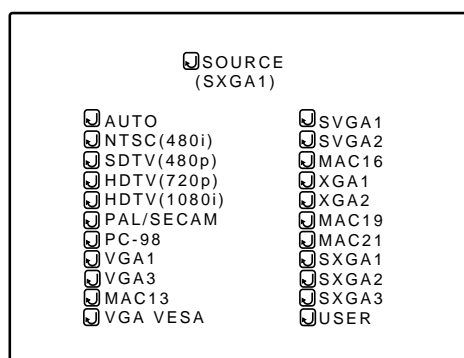

■ When a dedicated source mode is selected :

The selected item is shown in () below the displayed text of "SOURCE" on the upper part of the screen.

■ Submenu item

(SOURCE menu)

■ When USER is selected :

The "USER SOURCE SETUP" menu is displayed.

- This menu is used when registering and using special video signals that cannot be adjusted in "AUTO" mode or dedicated source mode, using "USER SOURCE SETUP" (see page 58).
- When the projector was shipped from the factory, "HD 1035 i _ R" and "HD 1035 i _ Y" were already registered.

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Items that can be set are different when video signals are input and when computer signals are input.
- For dedicated source signals (corresponding frequency, etc.) for computer signals, see page 19.
- To finish the menu display, press PAGE BACK Button twice (or three times).

1. Press the cursor buttons to select a setting.

2. Press the MENU/ENTER button to set.

- When a user source is selected, the source setting of the projector switches to a setting registered in the user source.

Operating the Main Menu (Cont.)

Setting Up Channels

■ Remote control unit

When you set up channels, you can select a line and multiple sources (up to 30) for each channel. If you are using a switcher and set a switcher numbers, you can also select each channel from the switcher side.

Memo

- With multiple sources having been set on channels, when a channel is selected, incoming signal is automatically checked and switched to one of the sources registered on the channel. If a matching source is not found among the registered sources, all other available sources are searched to find a matching source.

1 Press the MENU/ENTER button.

- The main menu appears on the screen.

2 Select the “CHANNEL” with the cursor button ▲ or ▼.

- The selected item (displayed in text) is shown in magenta color on the screen.

3 Press the MENU/ENTER button.

- A submenu item, “CHANNEL setup” menu, appears on the screen. For items of “LINE”, “SOURCE” and “SWNo” which are not set up, the symbol (■) is shown instead.

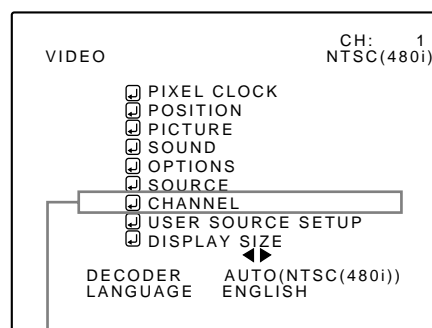

CHANNEL (AUTO)			
CH	LINE	SOURCE	SWNo
1	Y/C	NTSC(480i)	1
2	VIDEO	PAL/SECAM	2
3	■	■	■
4	■	■	■
5	■	■	■
6	■	■	■
7	■	■	■
8	■	■	■
9	■	■	■
10	■	■	■

(Channel Setup menu)

4 Press the cursor button ▲ or ▼ to select the channel (CH), then press the cursor button ▲ to move to “LINE”.

- The selected item is shown in magenta color on the screen.
- If any “LINE” item is not registered, you cannot select a “SOURCE” or “SWNo” item.

■ Main menu

Submenu item [CHANNEL]

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Items that can be set are different when video signals are input and when computer signals are input.
- For dedicated source signals (corresponding frequency, etc.) for computer signals, see page 19.

(To be continued on the next page)

Operating the Main Menu (Cont.)

Setting Up Channels (Cont.)

■ Remote control unit

5 Press the MENU/ENTER button to set (fix).

- The “LINE selection menu” is shown on the screen.

(Line selection menu)

6 Press the cursor button ▲ or ▼ to select a “LINE” item.

- The selected item (displayed in text) is shown in magenta color on the screen.
- The LINE item set up in this step uses the input terminal selected when you choose a channel, using such as a “direct channel”.

7 Press the MENU/ENTER button to set (fix).

- The display returns to the “CHANNEL setup” menu.
- After setting a “LINE” item, “SOURCE” and “SWNo” items can be set.

- To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

● To delete the contents of the channel registered (set up)

1. Move to the line of the channel you want to delete in step 4 and press MENU/ENTER to fix.
2. Select “NONE” from the Line Selection menu display in step 6 and press MENU/ENTER. The “LINE”, “SOURCE” and “SWNo” items of the selected channel will be deleted.

Operating the Main Menu (Cont.)

Setting Up Channels (Cont.)

■ Remote control unit

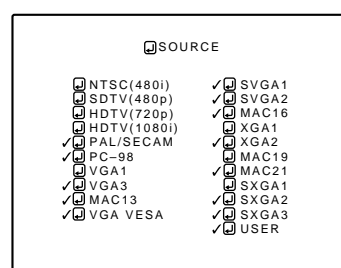

■ To set up a source, "SOURCE" :

1 Press the cursor button ► to move to "SOURCE".

- The main menu appears on the screen.
- If any "LINE" item is not registered, you cannot choose a "SOURCE" or "SWNo" item. First register a "LINE" item.

2 Press the MENU/ENTER button.

- The "SOURCE SETUP" menu is displayed on the screen.
- The "SOURCE" items that have been registered are shown with check marks.

(Source Setup menu)

3 Press the cursor button ▲ or ▼ to select the desired item, then press MENU/ENTER button to set or cancel.

- Once the item is set, it is indicated with a check mark and registered as a "SOURCE".
- If you select a "SOURCE" item with a check mark and press MENU/ENTER, the check mark will disappear, canceling its registration as a "SOURCE" item.
(When a channel is selected, the registration or setting of its contents cannot be cleared.)

■ When "USER" is selected from the "SOURCE SETUP" menu :

The "USER SOURCE SETUP" menu appears.

- The registered user source names are indicated with check marks.
- The source set up on the "USER SOURCE SETUP" menu is used for the user source name to be set here.

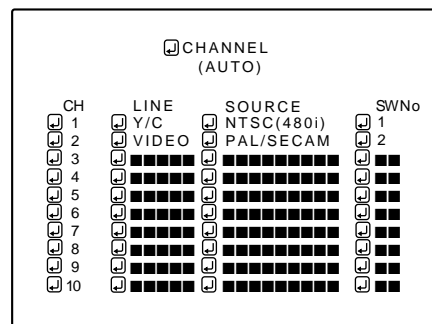

(User source Setup menu)

1. Press the cursor button ▲ or ▼ to select a source from the "SOURCE" items.

- The selected item (displayed in text) is shown in magenta color on the screen.

(To be continued on the next page)

■ CHANNEL setup menu

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Items that can be set are different when video signals are input and when computer signals are input.
- For dedicated source signals (corresponding frequency, etc.) for computer signals, see page 19.

Operating the Main Menu (Cont.)

Setting Up Channels (Cont.)

■ Remote control unit

2. Press the MENU/ENTER button to set.

- When the item is set, a check mark is placed next to its user name, which is registered as a "SOURCE".
- If you place the cursor on a "SOURCE" item with a check mark attached and press MENU/ENTER button, the check mark will disappear, making the item unregistered as a "SOURCE" item.

- To return to the main menu, press the **PAGE BACK** button. To finish the main menu, press **PAGE BACK** again.

Operating the Main Menu (Cont.)

Setting Up Channels (Cont.)

■ Remote control unit

■ CHANNEL setup menu

CHANNEL (AUTO)				
CH	LINE	SOURCE	Y/C	SWNo
1	VIDEO	NTSC(480i)	1	1
2	VIDEO	PAL/SECAM	2	2
3				
4				
5				
6				
7				
8				
9				
10				

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- Items that can be set are different when video signals are input and when computer signals are input.
- For dedicated source signals (corresponding frequency, etc.) for computer signals, see page 19.

■ To set up a switcher number "SWNo" :

1 Press the cursor button ► to move to "SWNo".

- The selected item is shown in magenta color on the screen.
- If any "LINE" item is not selected, you cannot choose a "SOURCE" or "SWNo" item. First, register a "LINE" item.

2 Press the MENU/ENTER button (fix).

- The "Switcher Number Setup" menu is displayed on the screen.

3 Press the cursor button ◀ or ▶ to select a number.

- Numbers that you can choose from are numbers from 1 to 20 and symbols "■■" that signify non-registration.
- Pressing the cursor ◀ makes the number smaller. Pressing the cursor ▶ makes the number larger.
- If you select "■■", any "SWNo" item is not registered.
- If a channel is selected, you cannot make any settings or changes.

4 Press the PAGE BACK button.

- When you press PAGE BACK, the switcher number is set, and the display returns to the "CHANNEL setup" menu.
- Be careful that if you set the same switcher number to a few channels and operate using the switcher number, the youngest-number channel is switched to because channels are read in the order of channel numbers.

Note

- If used in combination with a dedicated switcher, the channels of the projector can be automatically switched in conjunction with the switching of the switcher.

As an example, if you have set Switcher 1 (SWNo 1) to the Channel No. 1 (CH1), selecting Switcher 1 (SWNo 1) automatically switches to Channel No. 1 (CH1). (Communication setup between the projector and the switcher is required.)

For information on dedicated switchers, contact the dealer where you purchased your projector.

Operating the Main Menu (Cont.)

Changing Channels

■ Remote control unit

You can change channels where lines and sources have been set up. The channels can be switched by using either a “direct channel” or the “Channel setup/selection” menu.

■ To changing channels using a “Direct Channel” :

1 Press the PAGE BACK when no menu is displayed.

- The channel number is shown on the upper part of the screen.
- A channel number which has a line and source registered is displayed. (If no channel that has such registration is available, AUTO will be displayed.)

(Direct Channel switching menu)

2 Select the Channel number with the cursor button ▲ or ▼ .

- Numbers that you can choose from are numbers from 1 to 10 and AUTO.
- Pressing the cursor ▼ makes the number smaller.
- Pressing the cursor ▲ makes the number larger.
- If you press PAGE BACK, the selection will be canceled.

3 Press the MENU/ENTER button to set (fix).

- The display switches automatically to the line and source that are set for the channel.

- If you select AUTO and press MENU/ENTER to set, the source will be set up in “AUTO” mode.

Memo

- When AUTO is selected, all sources will become candidates to be displayed.
- When a channel is selected, the source registered to the selected channel is to be displayed.
- If the source being input is not registered (set up) to the channel selected, a “?” mark is put prior to the source name.

Operating the Main Menu (Cont.)

Changing Channels (Cont.)

■ Remote control unit

■ Changing channels on the “CHANNEL Setup/Selection” menu :

1 Press the MENU/ENTER button.

- The main menu appears on the screen.

2 Press the cursor button ▲ or ▼ to select a submenu item, CHANNEL.

- The selected item (displayed in text) is shown in magenta color on the screen.

3 Press the MENU/ENTER button.

- A submenu, “CHANNEL Setup/Selection” menu, is displayed on the screen.

CHANNEL (AUTO)				
CH	LINE	SOURCE	SWNo	
1	Y/C	NTSC(480i)	1	
2	VIDEO	PAL/SECAM	2	
3				
4				
5				
6				
7				
8				
9				
10				

(Channel Setup/Selection menu)

4 Press the cursor button ▲ or ▼ to select a channel (CH) you want to switch to.

- The selected CH is shown in magenta color.

5 Press the MENU/ENTER button to set (fix).

- The line input, source and switcher number that are registered to the channel are selected.

■ Main menu

Memo

- To be able to select a channel, you must already have registered a line input, source and switcher number to the channel.
- If the source being input is not registered (set up) to the channel selected, a “?” mark is put prior to the source name.

- To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

Operating the Main Menu (Cont.)

Setting up (or Change) User Sources

■ Remote control unit

A maximum of 10 types of information can be registered regarding the source being input and projected through line connection.

Memo

Before setting up a user source

Before operating to set up (or change) a user source, be sure to force the incoming signal to be input in AUTO mode.

- Select "AUTO" on the Source Setup menu (see pages 47 and 48).
- Select "AUTO" with a direct channel (see page 54).

1 Press the MENU/ENTER button.

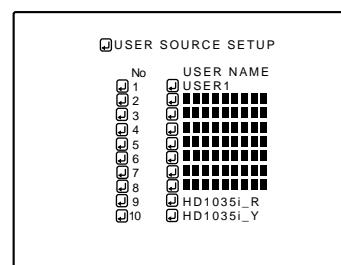

- The main menu appears on the screen.

2 Press the cursor button ▲ or ▼ to select "USER SOURCE SETUP".

- The selected item (text display) is shown in magenta color.

3 Press the MENU/ENTER button.

- A submenu, "USER SOURCE SETUP" menu is displayed on the screen.
- A "■" is displayed for any "No" where no user source is registered.

(User Source Setup menu)

4 Press the cursor button ▲ or ▼ to select a new number you want to register (or the number whose registered contents you want to change).

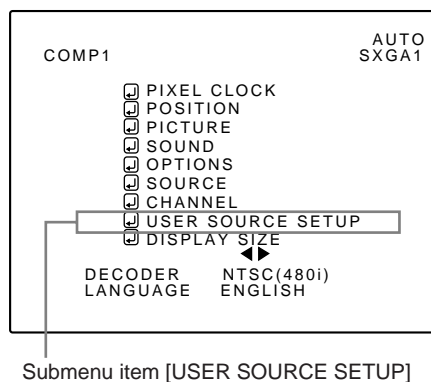

- The selected item (text display) is shown in magenta color.

5 Press the MENU/ENTER button to set (fix).

- The source data of the line currently selected are registered as user data and a temporary user name "USER x" (x is a selected number) is displayed.
- If you select and fix a "No" where a source is already set up, the old contents are overwritten with those of the newly set source.

- To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

■ Main menu

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.

Operating the Main Menu (Cont.)

Setting up (or Change) User Sources (Cont.)

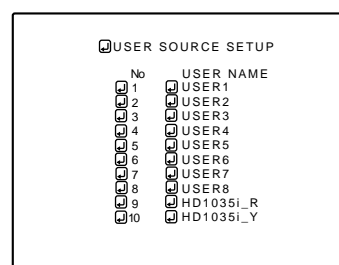

■ Remote control unit

To set up (change) user names

The procedure for setting up or changing user names given to user sources is described below.

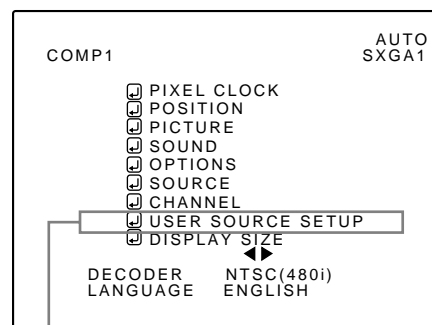

- 1 Press the MENU/ENTER button.**
 - The main menu appears on the screen.
- 2 Press the cursor button ▲ or ▼ to select “USER SOURCE SETUP”.**
- 3 Press the MENU/ENTER button.**
 - A submenu, “User Source Setup”, is displayed on the screen.

(User Source Setup menu)

- 4 Press the cursor button ▲ or ▼ to select the number (No) where to set up or change a user name.**
 - The selected item (text display) is shown in magenta color.
- 5 Press the cursor button ► to move to “USER NAME”.**
 - The selected item (text display) is shown in magenta color.
 - To be able to select “USER NAME”, a source must already be set up.

■ Main menu

Submenu item [USER SOURCE SETUP]

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.

(To be continued on the next page)

Operating the Main Menu (Cont.)

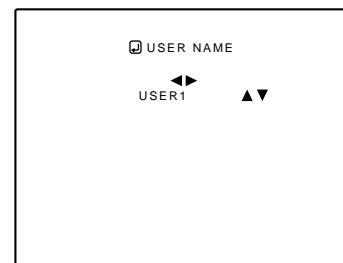

Setting up (or Change) User Sources (Cont.)

■ Remote control unit

6 Press the MENU/ENTER button.

- The “USER NAME” setup menu appears.
If a user name is not registered to the selected number (“No”), the source area of the selected line is registered as a user source, and a temporary user name is displayed on the “USER NAME” item on the screen.

(User Name Setup menu)

1. Press the cursor button ◀ or ▶ to select positions where to enter characters.

- Up to 9 input positions can be selected.

2. Press the cursor button ▲ or ▼ to select characters to enter.

- You can select any characters from A to Z, 0 to 9, _ and space.

3. Repeat steps “1” and “2” to enter the user name.

- Up to 9 characters can be entered.

4. Press PAGE BACK button to set the user name.

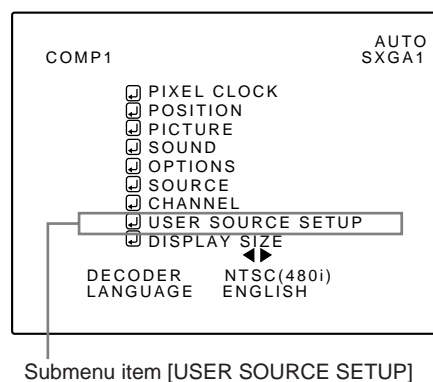

- When you press PAGE BACK, the user name is set, and the display will return to the “User Source Setup” menu.

• To delete user names

Overwrite the user name with spaces.

- However, if this user name area is already registered as a source to any other channel on the “Channel Setup/ Selection” menu, or if the user name area is already selected in AUTO mode or dedicated (forced) mode, this user name cannot be deleted. The user name before change will be displayed instead.

■ Main menu

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.

- To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

Operating the Main Menu (Cont.)

Setting up or Changing the Display Size

■ Remote control unit

The image display size (the numbers of horizontal /vertical effective dots and horizontal /vertical display positions) of the input signals (sources) registered in the user source setup can be adjusted.

1 Press the MENU/ENTER button.

- The main menu appears on the screen.

2 Press the cursor button ▲ or ▼ to select “DISPLAY SIZE”.

- The selected item (text display) is shown in magenta color.

3 Press the MENU/ENTER button to set (fix).

- A submenu, “DISPALAY SIZE”, is shown on the screen. (Display Size adjustment menu)

(Display Size adjustment menu)

4 Press the cursor button ▲ or ▼ to select an item to adjust.

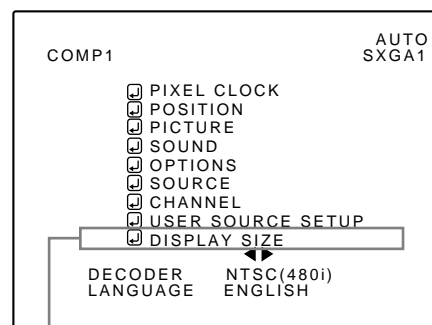

- The selected item (text display) is shown in magenta color.

5 Press the cursor button ◀ or ▶ to make adjustments.

- To adjust other items, repeat steps 4 and 5.

Item to adjust	Contents of adjustment
H PIXEL	Adjusts the number of horizontal effective dots. Adjustment value (640 ↔ 1280)
V PIXEL	Adjusts the number of vertical effective dots. Adjustment value (350 ↔ 1024)
H CENTER	Adjusts the horizontal display position. Adjustment value (0 ↔ 639)
V CENTER	Adjusts the vertical display position. Adjustment value (1 ↔ 511)

■ Main menu

Submenu item [DISPLAY SIZE]

Notes

- The selected item is shown in magenta color. Items shown in gray color cannot be operated or set in the current mode.
- This feature does not work with AV (video) input signals. It works only with computer input signals.

- To return to the main menu, press the PAGE BACK button. To finish the main menu, press PAGE BACK again.

Notes

- You are recommended to make adjustments using the following procedure:
 1. Adjust “H PIXEL” and “V PIXEL” on the Display Size adjustment menu.
 2. Perform automatic adjustment using “Quick Alignment” function (see page 29).
 3. Fine-adjust the horizontal and vertical positions on the “Position” menu (see page 39). Then, fine-adjust “H CENTER” and “V CENTER”.

Replacing the Fuse

A fuse is used to protect the power source of the projector. If the fuse is burned out, replace it. When the power switch is turned on but no power is supplied to the projector, check the fuse. When replacing the fuse, obtain the same type of fuse rated 15A/250V. If there are any unclear points, contact the dealer where you purchased your projector.

- 1 Turn off the main power switch and disconnect the power cord from both the projector and the wall outlet.**

Place the main power switch to the OFF [O] position.

- 2 Loosen the fuse holder to remove it.**

To loosen the fuse holder, use a Philips screwdriver.

- 3 Remove the fuse from the fuse holder you just removed.**

- 4 Install the new fuse into the fuse holder.**

- 5 Reinstall the fuse holder into the projector.**

Replacing the Light-Source Lamp

The light-source lamp has its service life. It is approximately 1000 hours.

When the light-source lamp approaches the end of its service life, its degradation progresses rapidly. When the lamp's used hours exceed 900 hours, the projector's LAMP indicator comes on. Also, at the start of projection (lamp energized), the message "REPL.-LAMP" appears on the projection screen for about two minutes. Then, replace with a new light-source lamp, or arrange for a replacement lamp. When lamp's service has reached 1000 hours, the projector's LAMP indicator starts blinking, and if you press the OPERATE button (or press the remote control's OPERATE button for more than one second), the light-source lamp does not turn on. The specified lamp replacement period is 1000 hours, but depending on use conditions, the replacement period may vary. If video image is dark and its color tint is extraordinary even after you have adjusted color tint and brightness, replace the light-source lamp a little earlier.

Purchase new light-source lamps (part No. : BHL5003-SU) from the authorized dealer where you have purchased the projector, or consult the Service center.

CAUTIONS and NOTES

- If the projector is set up in a tight place which is unsuitable for work, and if you perform replacement work there, this could hurt you. Move the projector to a place wide enough for work, and then replace the lamp.
- Use a genuine product for the light-source lamp. If you use other than a genuine product, this could cause a malfunction. Also, never use an old light-source lamp. An old lamp could cause marked degradation in performance or explode itself, possibly causing the projector to malfunction. Also, its broken pieces could come out of the projector and harm you when replacing the light-source lamp.
- Do not replace the light-source lamp immediately after the projector has been used. The temperature of the light-source lamp is still high and could cause a burn. Be sure to allow a cooling period of one hour or more before performing replacement work.
- Before starting lamp replacement work, turn off the MAIN POWER switch (see page 26), and disconnect the power cord from the wall outlet. If you perform the replacement work with the power cord left connected, this could cause harm or electric shock.
- Never discard an old light-source lamp (used lamp), as is. Otherwise, this could involve a great danger. The lamp contains a xenon gas inside, which is applying a high pressure. If the gas is not removed, it could cause the lamp to explode. For handling used lamps, refer to the manual supplied with the new replacement lamp you have purchased. If you have any questions, consult a authorized dealer where you have bought the replacement lamp or Service center.

1 Remove the lamp-replacement opening cover by loosening screws.

Loosen the two screws with a flat-end screwdriver.

Note

- The screws are fitted so that they do not come off the lamp-replacement opening cover.

ENGLISH

Replacing the Light-Source Lamp (Cont.)

2 Loosen the lamp-unit screws, raise the handle, and pull out the lamp unit.

Loosen the two screws with a flat-end screwdriver.

Note

- The screws are fitted so that they do not come off the lamp-unit.

3 Insert the new lamp unit fully inside and fasten the screws.

Fasten the two screws with a flat-end screwdriver.

CAUTION

- Do not touch the glass surface of the light-source lamp directly with your hand as well as staining it. If you touch with a bare hand, stains on your hand may adhere to the lamp, possibly preventing the lamp from performing as specified due to a shortened lamp life, a darkened screen, etc. To handle a new light-source lamp, hold its plastic part. Never touch the metal part or the front glass surface.

4 Replace the lamp-replacement opening cover and fasten the screws.

Fasten the two screws with a flat-end screwdriver.

CAUTIONS

- Install the lamp unit and close the lamp-replacement opening cover correctly; otherwise, a safety switch is activated to prevent the projector from operating.
- If the claw on the lamp-replacement opening cover is damaged, the projector may not possibly operate. Then, replace with a new lamp-replacement opening cover.
- After replacing the lamp, be sure to reset the lamp use time (see page 63).

Replacing the Light-source Lamp (Cont.)

Resetting the Lamp Use Time

After replacing with a new light-source lamp, reset the counter inside the projector. This works to reset the life calculation of the light-source lamp, allowing the used time of the new light-source lamp to be accumulated.

■ Projector's button

[MAIN POWER switch]

1 Turn on the MAIN POWER switch to go into stand-by mode.

- ON [I]: The main power turns ON and the STAND BY indicator lights.

2 Press and hold down the “VIDEO”, “SETTING” and “QUICK ALIGN. + ►” at the same time for six seconds or more.

- The STAND BY and OPERATE indicators come on at the same time.

3 While the STAND BY and OPERATE indicators are on, press the “VIDEO”, “SETTING”, and “COMPUTER” buttons at the same time.

- The STAND BY and OPERATE indicators blink two seconds alternately, and after blinking, the projector returns to stand-by state (the STAND BY indicator lights).

* This completes the resetting of the lamp use time.

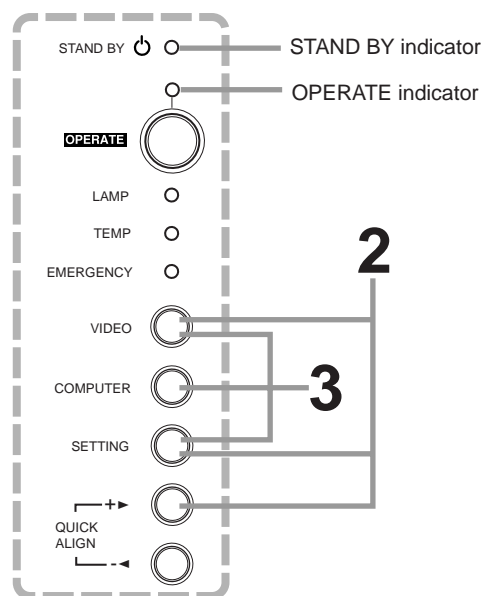

Memo

To check the lamp use time has been reset :
You can check it by LAMP TIME on the OPTIONS menu.

CAUTIONS

- After replacing with a new light-source lamp, be sure to reset the lamp use time. When the lamp use time indicates 1000 hours, and if it is not reset, the projector does not operate. (The light-source lamp does not turn on.)
- Reset the lamp use time only when you have replaced with a new light-source lamp. Never reset it at a halfway time. Otherwise, the replacement time may become unclear, degrade performance markedly, or cause lamp explosion.

[Control panel]

ENGLISH

Cleaning and Replacing the Filter

Clean the filter periodically. If the filter is heavily stained and does not get clean, or if it is damaged, replace the filter with a new filter (part No.: LC30208). Otherwise, dirt may get inside and appear on the screen, possibly preventing you from enjoying the video image fully. If dirt gets inside or if you need information about the filter, consult a authorized dealer where you have purchased the projector or Service center.

1 Turn off the MAIN POWER switch.

After the projector goes into stand-by state with the STAND BY indicator on, turn off the main power switch and pull out the power cord from the projector and the wall outlet.

2 Remove the filter.

Loosen the screw with a flat-end screwdriver.

Notes

- The screws are fitted so that they do not come off the filter.
- If the filter is clogged with dirt, etc., the projector goes into an emergency mode (the EMERGENCY indicator blinks). So, clean the filter periodically. For the emergency mode, refer to pages 9 and 25.

Be careful not to damage the claws.

3 Clean the filter.

Clean the filter with a neutral detergent, wash it in water, and then dry it in the shade.

CAUTIONS

- Put on rubber gloves when using neutral detergent.
- After you have washed the filter in water, make sure the filter is completely dry before reinstalling it. Otherwise, electric shock or malfunction could occur.
- Do not clean the filter using a vacuum cleaner. Since the filter is soft, it may be sucked into the vacuum cleaner or damaged.

4 Reinstall the filter.

Fasten the screw with a flat-end screwdriver.

Notes

- Install the filter correctly. Otherwise, the projector does not operate. (Goes into an emergency mode.)
- If the filter's claws are damaged, the projector may not operate. Then, replace with a new filter.

Troubleshooting

Solutions to common problems related to your projector are described here. If none of the solutions presented here solves the problem, unplug the projector and consult a authorized dealer or service center.

Symptom	Probable cause	Corrective action	Page
Power is not supplied.	• Is the power cord disconnected?	• Insert the power cord (plug) firmly.	24
	• Is the main power switch turned on?	• Turn on the MAIN POWER switch.	26
	• Is fuse burned out?	• Turn off the main power switch, and check the fuse. If it is burned out, replace it.	60
	• Is the lamp-replacement opening cover closed correctly?	• Turn off the MAIN POWER switch, close the lamp-replacement opening cover, and turn on the main power switch again.	26, 62
	• Is the air filter closed correctly?	• Turn off the MAIN POWER switch, fit the air filter correctly, and turn on the main power switch again.	26, 64
	• Has the lamp life expired? (Has the lamp use time reached 1000 hours?)	• Turn off the MAIN POWER switch, replace with a new light-source lamp, and turn on the MAIN POWER switch. Reset the lamp use time after replacing with a new lamp.	26, 61, 63
Light is not emitted, or light level is low.	• Is the lens cap removed?	• Remove the lens cap.	24
	• Is the lamp life near its end?	• Check the lamp use time on the menu, and if the lamp life is near its end, arrange for a replacement lamp, or replace a little earlier.	44
With power on, operation starts but stops in a few minutes.	• Is the air intake or exhaust area blocked?	• Turn off the MAIN POWER switch, remove any blocking objects, and turn on the MAIN POWER switch again.	6, 8, 15, 26
Video image does not appear, or audio sound does not occur.	• Is the correct input selected?	• Select the correct inputs with the VIDEO and COMPUTER buttons.	27
	• Are connected devices connected correctly?	• Connect connected devices correctly.	20
	• Are signals being supplied from the connected devices?	• Set connected devices correctly.	—
	• Are input signals (scanning frequency, etc.) appropriate?	• Check if the signal is correct as input (scanning frequency, etc.). Input the appropriate signal.	19
	• Is the source setting correctly selected? Isn't the wrong source (forced mode) or channel selected?	• Set the source setting to AUTO, or to the correct dedicated source (forced mode) or channel.	47, 49, 54
	• Is brightness adjusted correctly?	• Adjust brightness on the menu.	40
	• Is volume set at minimum?	• Adjust volume with the remote control's VOL. (+/-) buttons.	28
	• Aren't video and audio turned off by pressing the remote control's AV MUTING button?	• Press the remote control's AV MUTING button to turn video and audio on.	29
While playing video, image is sometimes disturbed.	• Weve adjustments performed correctly during installation?(Have you added any new device after installation adjustments?)	• To have installation adjustments performed, ask the dealer where your projector or service senter.	—
Video image dims.	• Is focus adjusted correctly?	• Adjust focus with the remote control's FOCUS (+/-) buttons.	28
	• Is distance too short or too long?	• Set the projector at the correct distance.	16, 17
	• Are TRACKING and PHASE adjusted correctly?	• Adjust TRACKING and PHASE on the menu.	32, 38

Symptom	Probable cause	Corrective action	Page
Video image is abnormally dark or bright.	• Is picture quality (color density, etc.) adjusted correctly?	• Adjust picture quality on the menu.	40
	• Is the correct CLAMP selected?	• Select the correct CLAMP on the OPTION MENU.	44
Color is poor or unstable.	• Is picture quality (color density, etc.) adjusted correctly?	• Adjust picture quality on the menu.	40
	• Is the correct broadcast system (color system) selected?	• Set the broadcast system (color system) to AUTO.	36
	• Are signals (scanning frequency, etc.) to connected devices appropriate?	• Check if the signal is appropriate (scanning frequency, etc.), and input the appropriate signal.	19
	• Is the source setting correctly selected? Isn't a wrong source (forced mode) selected?	• Set the source setting to AUTO. If the problem still persists, set it to the correct dedicated source (forced mode).	47,49,54
The upper part of the video image bows or distorts.	• While computer system signal is input, isn't a sync signal for composite sync (Cs) or G on sync being input?	• Input separate sync signals for vertical sync (V) and horizontal sync (H) signals.	12
	• Isn't signal with much jitter or skew distortion being input to a video deck?	• Input signals with little jitter or distortion.	—
	• Is the source setting correctly selected? Isn't a wrong source (forced mode) or channel selected?	• Set the source setting to AUTO, or to the correct dedicated source (forced mode) or channel.	47,49,54
Video image and audio sound suddenly go out.	• Are video picture and audio turned off by pressing the AV MUTING button on the remote control unit?	• Turn on video picture and audio by pressing the remote control's AV MUTING.	29
Remote control unit does not work.	• Are batteries installed correctly?	• Match the polarities of batteries correctly (+ to + and - to -).	14
	• Are batteries exhausted?	• Replace with new batteries.	14
	• Is there a shielding object between the remote control unit and the remote sensor?	• Remove any shielding objects.	18
	• Is the distance too long?	• Use the remote control unit at a nearer point.	18

■ When the emergency indicator starts blinking:

Refer to the CAUTION and NOTES on page 25.

* This projector is equipped with a microcomputer that may operate abnormally due to interference from external components. If this happens, turn off the main power and disconnect the power cord from the wall AC outlet. Then reconnect the power cord to AC outlet and turn on the main power again.
(For the turning on and off the power, see pages 25 to 26.)

Maintenance

• Stains on the cabinet

Should be wiped off with a soft cloth. If the cabinet is heavily stained, wipe it with a cloth soaked in water-diluted neutral detergent and wrung well, then wipe clean with a dry cloth.

• Since the cabinet may deteriorate in quality, become damaged or get its paint peeled off, be careful about the following:

- Do not wipe it with a hard cloth.
- Do not wipe it strong.
- Do not wipe it with thinner or benzene.
- Do not apply any volatile substance such as insecticides to it.
- Do not allow any rubber or vinyl article to remain in contact with it for a long time.

• Stains on the lens

Should be cleaned off with commercially available blowers or lens cleaning paper (for cleaning glasses and cameras).

Do not use liquid cleaning agents. This could cause the surface coating to be removed.

Do not rub or hit the lens as its surface is prone to damage.

Specifications

Optical mechanism system

- Projection method 3D-ILA device, 1 lens, 3 primary color optical shutter method
- D-ILA device 0.9" (2.3cm) measured diagonally (1365 pixels × 1024 pixels) × 3 (Total number of pixels : 4,193,280)
- Projecting lens Electric-driven zoom of 1.5 ×
- Screen size Approx.42" (107cm) to Approx.300" (762cm) [recommended] to Approx.521" (1323cm) [maximum] measured diagonally (*with aspect ratio : 4 : 3)
- Light-source lamp 550 W xenon lamp

Electrical system

- Color system NTSC, NTSC4.43, PAL, SECAM (* Automatic switching / manual switching)
- Resolution 1365 dots × 1024 dots (*S-XGA full resolution, during RGB input)
1000TV lines (*Horizontal resolution, aspect ratio 4 : 3, during video input)
- Scanning frequency Horizontal frequency : 15 kHz ~ 82 kHz
Vertical frequency : 50 Hz ~ 78 Hz

Input / output

[AV IN (AV IN input)]

- Y/C 1-line, mini-DIN 4 pin × 1
Y (luminance signal) : 1V(p-p), 75Ω (negative sync)
C (chroma signal) : 0.286V(p-p) (burst signal), 75Ω [NTSC]
: 0.3V(p-p) (burst signal), 75Ω [PAL]
- VIDEO 1-line, BNC × 1
Composite video signal : 1V(p-p), 75Ω (negative sync)
- Y, P_B/B-Y, P_R/R-Y 1-line, BNC × 3
Component (Y,B-Y,R-Y) signals
Y : 1V(p-p), 75Ω (negative sync)
B-Y : 0.7V(p-p), 75Ω
R-Y : 0.7V(p-p), 75Ω
DTV-format signals
[480i (ITU-R BT. 601-4), 480p (SMPTE 293M)]
Y : 1V(p-p), 75Ω (negative sync)
P_B, P_R : 0.7V(p-p), 75Ω
[720p (SMPTE 296M), 1080i (SMPTE 274M)]
Y : 1V(p-p), 75Ω (3-value sync)
P_B, P_R : 0.7V(p-p), 75Ω
- AUDIO L/R (for AV IN) 1-line, RCA × 2
Audio signal : 0.5V(rms), high impedance

[COMPUTER IN (COMPUTER input)]

- COMPUTER IN-1 (PC) 1-line, D-sub 3-row 15 pin × 1
Analog RGB signal
R : 0.7V(p-p), 75Ω
B : 0.7V(p-p), 75Ω
G : 0.7V(p-p), 75Ω
G on Sync : 1V(p-p), 75Ω (negative sync)
Sync signal : 1V(p-p) to 5V(p-p), high impedance (positive/negative polarity)
* Some connected devices may not correspond to composite sync (Cs) or G on sync signal.
- AUDIO 1-line, stereo mini-jack × 1
(For COMPUTER IN-1) 0.5V(rms), high impedance
- COMPUTER IN-2 1-line, BNC × 5
Analog RGB signal
R : 0.7V(p-p), 75Ω
B : 0.7V(p-p), 75Ω
G : 0.7V(p-p), 75Ω
G on sync : 1V(p-p), 75Ω (negative sync)

Specifications (Cont.)

	<u>Horizontal sync/composite sync signal (H/Cs)</u>
H	: 1V(p-p) to 5V(p-p), high impedance (positive/negative polarity)
Cs	: 1V(p-p) to 5V(p-p), high impedance (positive/negative polarity)
	<u>Vertical sync signal (V)</u>
V	: 1V(p-p) to 5V(p-p), high impedance (positive/negative polarity)
	* Some connected devices may not correspond to composite sync (Cs) or G on sync signal.
• AUDIO	1-line, stereo mini-jack × 1
(For COMPUTER IN-2)	0.5V(rms), high impedance
[COMPUTER OUT (COMPUTER OUTPUT)]	
• COMPUTER OUT	1-line, D-sub 3-row 15-pin × 1
	<u>Analog RGB signal</u>
R	: 0.7V(p-p), 75Ω
B	: 0.7V(p-p), 75Ω
G	: 0.7V(p-p), 75Ω
G on sync	: 1V(p-p), 75Ω (negative sync)
	<u>Horizontal sync/composite sync signal (H/Cs)</u>
H	: TTL level (Polarity : Same for input)
Cs	: TTL level (Polarity : Same for input)
	<u>Vertical sync signal (V)</u>
V	: TTL level (Polarity : Same for input)
• AUDIO OUT	1-line, stereo mini-jack × 1
	0V(rms) to 0.5V(rms) (variable output)
[CONTROL]	
• RS-232C	: 1-line, D-sub 9-pin × 1
	* RS-232C-interface specified control terminal for controlling this projector with a personal computer.
• REMOTE	: 1-line, mini-jack × 1
	* Remote terminal for connecting an infrared remote sensor extension unit, etc.
[Other]	
• Audio power output (effective)	1 W + 1 W
• Built-in speaker	6cm × 3 cm (2-3/8" × 1-1/8") oval type × 2, impedance 8 Ω

General

• Power requirements	AC120 V, 60 Hz
• Power consumption	10 A
• Allowable operation temperature	+ 5°C to + 35°C (41°F to 95°F)
• Allowable relative humidity	20% to 80% (no condensation)
• Allowable storage temperature	– 10°C to + 60°C (14°F to 140°F)
• Maximum outside dimensions	Approx. (W)505mm × (H)264mm × (D)388 mm (20" × 10-1/2" × 15-3/8") (excluding protruding parts)
• Weight	Approx. 38.1 lbs.(17.3kg)
• Accessories	(Refer to page 5.)

* Design and specifications are subject to change without notice.

* D-ILA devices are manufactured with a very high-precision technology, allowing 99.99% of the pixels to be effective. Only 0.01% or less of the pixels are missing or always on.

* For easy understanding, pictures and illustrations are shown by being emphasized, omitted or composed, and may be more or less different from actual products.

*TRADEMARKS

IBM, IBM PC, and VGA are registered trademarks of International Business Machines Corporation. Macintosh is registered trademarks of Apple Computer, Inc.

VESA is a trademark of the non-profit organization Video Electronics Standard Association.

All other product names mentioned herein are used for identification purposes only, and may be the trademarks or registered trademarks of their respective companies.
